How Cool Are Penguins is a book that will introduce young children to the world of penguins. It is written and illustrated in a fun and informative way that will entertain both the young and the young at heart.

A practical restoration manual on the E36, the 3 Series BMWs built between 1990 & 1999. Covers all models from the 316 compact to the M3. Advice is given on acquiring a good pre-owned example plus restoring & modifying engines, bodywork, trim, electrics, suspension & mechanical parts. Detailed information on Alpina & M3 cars. A total of 148 fully illustrated colour and black & white

Extensively researched and authoritatively and enthusiastically written, entries describe in detail the history of each particular company and of course the models for which they are famous.

This is a brilliant examination of the complex processes of the post-1990 transformation in the Czech automotive industry and its selective integration into the West European system. The post-1990 restructuring of the industry is analyzed in the context of its pre-1990 development and in the context of the East European automobile industry as a whole. Specifically, the book examines the development and post-1990 restructuring of the Czech car, components, and truck industries.

Text of the Agreement (under the Yukon Umbrella Final Agreement) between the Tlingit Indians of the Teslin area of southern Yukon, on self government, further to Chapter 24 of the Final Agreement.

The 1973 oil crisis forced the American automotive industry into a period of dramatic change, marked by stiff foreign competition, tougher product regulations and suddenly altered consumer demand. With gas prices soaring and the economy in a veritable tailspin, muscle cars and the massive "need-for-speed" engines of the late '60s were out, and fuel efficient compacts were in. By 1980, American manufacturers were churning out some of the most feature laden, yet smallest and most fuel efficient cars they had ever built. This exhaustive reference work details every model from each of the major American manufacturers from model years 1973 through 1980, including various "captive imports" (e.g. Dodge's Colt, built by Mitsubishi.) Within each model year, it reports on each manufacturer's significant news and details every model offered: its specifications, powertrain offerings, prices, standard features, major options, and production figures, among other facts. The work is heavily illustrated with approximately 1,300 photographs.

Vehicle maintenance.

Do your kids love animals? Elliot takes on an adventure following a group of raccoons all around Sag Harbor the night before the town's annual HarborFest celebrations. He watches the plump little comedians feast on a buffet of discarded food as they run from place to place, leaving messes in their wake. If only the owners of those trash bins learned what Elliot had learned from a wildlife expert at school. Elliot is just a secret observer until he has the chance to help and forms a bond with the adorable group of raccoons! Funny and empowering, the Elliot's Adventures children's books are an ode to loving the world we live in by respecting nature and wildlife. The stories are designed to stimulate children's imaginations and encourage unstructured outdoor play at a time when kids are spending more hours than ever behind a screen each day. A mother and son collaboration, this series is a celebration of parents and children everywhere. A perfect book for parents and kids who: - Enjoy silly adventures - Love to learn about animals - Care about the environment - Want to protect wildlife - Believe kids can make a difference.
