Cheap TFT 2.2 Inch

Display on Arduino

(ILI9340C or

ILI9341): I ordered a

240 x 320 pixel 2.2

inch TFT LCD display

off of ebay for £3.86

which is dirt cheap

compared to similar

Access Free 2 8

Qvga 262k Tft

displays from some of
the western

companies. The only
problem was that

there wasn't a guide
to how to get it

working! When I
figured i...

bit color with a
microSD breakout.

There are two ways to
wire up these

displays: Software SPI

is a more flexible

method (you can use

any pins on the

Arduino) and

hardware SPI is much

faster (4-8x faster)

but you are required

to use the hardware

SPI pins.. Since the

Access Free 2 8

Qvga 262k Tft

display is quite large,
we found that
drawing would seem
really slow if using
'software' SPI.
