7.5 Strategy for Integration. Integration is hard relative to differentiation. Almost any function built from elementary functions can be differentiated using the Product, Quotient, and Chain Rules. With integration you have es- sentially three tools: 1.A list of standard forms (the master-list below is more than enough for this course) 2.Substitutions 3.Integration by parts It is entirely possible that you are faced with an integral that cannot be computed using these meth- ods.
