Albemarle County Public Schools Maker Culture

By Chad Ratliff and Pam Moran, District Administrators, Albemarle County Public
Schools (Charlottesville, VA) A few weeks ago, some of our young people reminded
us that “making” is a mindset that can occur any time, any place. During a snow
day, a group of kids were co-opted by a local teenage video “maker” into creating
and publishing a fabulous YouTube video, “Call Me Maybe, Josh Davis.”

The Maker Mindset: Albemarle County Public Schools & Maker ...

Albemarle supports maker education through funding for supplies and spaces, a
wide range of professional development, and division-wide resources -- like
instructional coaches -- who work closely with teachers. In doing so, the district has
created a culture of making.

Maker Education Fires Up a Passion for Learning | Edutopia

Every day across the 26 school communities of Albemarle County Public Schools,
educators are creating, designing, and making learning experiential, active, and
powerful. They have one primary goal—to engage young people in their own
learning—and at a higher level than the day before.

By Mary Jo Madda (Columnist) May 2, 2016. This article is part of the guide What's Next for Maker Education. Superintendent Pam Moran and the whole crew at Charlottesville's Albemarle County Public School system have received their fair share of press (from Maked.org to Edutopia) for bringing the Maker Movement to Virginia schools. Back in 2013, for example, NBC highlighted the district's library-turned-makerspace.

In-person school is being canceled for students with Albemarle Co. Public Schools, Buckingham Co. Public Schools, Greene Co. Public Schools, and Lo. County Public Schools Thursday, November 12.

This book shows you how, even with a tight budget and limited space, you can foster "maker mentality" in your library and help patrons reap the learning benefits of making—with or without a makerspace. • Offers librarians creative ways to become involved in the exciting maker movement and encourage maker mentality among patrons • Presents an approach through which any library, no matter their size or budget, can participate • Speaks to all ages, experience levels, and educational levels • Fills a gap in the literature by providing libraries with limited resources the means to offer maker opportunities

The Agency by Design guide to implementing maker-centered teaching and learning *Maker-Centered Learning* provides both a theoretical framework and practical resources for the educators, curriculum developers, librarians, administrators, and parents navigating this burgeoning field. Written by the expert team from the Agency by Design initiative at Harvard's Project Zero, this book identifies a set of educational practices and ideas that define maker-centered learning, and introduces the focal concepts of maker empowerment and sensitivity to design. Shares cutting edge research that provides evidence of the benefits of maker-centered learning for students and education as a whole. Presents a clear Project Zero-based framework for maker-centered teaching and learning Includes valuable educator resources that can be applied in a variety of design and maker-centered learning environments Describes unique thinking routines that foster the primary maker capacities of looking closely, exploring complexity, and finding opportunity. A surge of voices from government, industry, and education have argued that, in order to equip the next generation for life and work in the decades ahead, it is vital to support maker-centered learning in various educational environments. *Maker-Centered Learning* provides insight into what that means, and offers tools and knowledge that can be applied anywhere that learning takes place.

Making is a dynamic and hands-on learning experience that directly connects with long-established theories of how learning occurs. Although it hasn't been a focus of traditional education or had a prominent place in the classroom, teachers find it an accessible, exciting option for their students. The maker movement brings together diverse communities dedicated to creating things through hands-on projects. Makers represent a growing community of builders and creators—engineers, scientists, artists, DIYers, and hobbyists of all ages, interests, and skill levels—who engage in experimentation and cooperation. Transferring this innovative, collaborative, and creative mindset to the classroom is the goal of maker education. A makerspace isn't about the latest tools and equipment. Rather,

Download File PDF Albemarle County Public Schools Maker Culture

it's about the learning experiences and opportunities provided to students. Maker education spaces can be as large as a school workshop with high-tech tools (e.g., 3D printers and laser cutters) or as small and low-tech as the corner of a classroom with bins of craft supplies. Ultimately, it's about the mindset—not the "stuff." In *Learning in the Making*, Jackie Gerstein helps you plan, execute, facilitate, and reflect on maker experiences so both you and your students understand how the knowledge, skills, and attitudes of maker education transfer to real-world settings. She also shows how to seamlessly integrate these activities into your curriculum with intention and a clearly defined purpose.

From the author of *Mindfulness for Teachers*, a guide to supporting trauma-exposed students. Fully half the students in U.S. schools have experienced trauma, violence, or chronic stress. In the face of this epidemic, it falls increasingly to teachers to provide the adult support these students need to function in school. But most educators have received little training to prepare them for this role. In her new book, *Tish Jennings*—an internationally recognized leader in the field of social and emotional learning—shares research and experiential knowledge about the practices that support students' healing, build their resilience, and foster compassion in the classroom. In Part I, Jennings describes the effects of trauma on body and mind, and how to recognize them in students' behavior. In Part II, she introduces the trauma-sensitive practices she has implemented in her work with schools. And in Part III, she connects the dots between mindfulness, compassion, and resilience. Each chapter contains easy-to-use, practical activities to hone the skills needed to create a compassionate learning environment.

Reinvent public schools with proven, innovative practices Our homes, communities, and the world itself need the natural assets our children bring with them as learners, and which they often lose over time on the assembly line that pervades most of the public education system today. We see no actions as more important in school than developing, supporting, and reinforcing children's sense of agency, the value of their voices, and their potential to influence their own communities. In *Timeless Learning*, an award-winning team of leaders, Chief Technology Officer Ira Socol, Superintendent Pam Moran, and Lab Schools Principal Chad Ratliff demonstrate how you can implement innovative practices that have shown remarkable success. The authors use progressive design principles to inform pathways to disrupt traditions of education today and show you how to make innovations real that will have a timeless and meaningful impact on students, keeping alive the natural curiosity and passion for learning with which children enter school. Discover the power of project-based and student-designed learning Find out what "maker learning" entails Launch connected and interactive digital learning Benefit from the authors' "opening up learning" space and time Using examples from their own successful district as well as others around the country, the authors create a deep map of the processes necessary to move from schools in which content-driven, adult-determined teaching has been the traditional norm to new learning spaces and communities in which context-driven, child-determined learning is the progressive norm.
