Ancient calendars found around the world are designed to end one point in time. They communicate an urgent warning to everyone alive today! Complex bronze and gold clocks with multiple dials are found in museums around the world. Why they have such advanced intricacy has stumped scientists for hundreds of years. This book reveals why the ancients built so many pyramids, observatories as well as those complex gold and bronze clocks with more than one dial. It surprised me greatly to discover that their various complex designs in one way or another converge on 21 December 2012. It amazes me that ancient cultures separated by thousands of miles of geography and thousands of years in chronology agree so precisely in the cyclical nature of time, history and prophecy, which is history written in advance. The most famous example is the Mayan-Aztec calendar, which ends its 25,626-year cycle on that momentous date. Some researchers have also found 21 December 2012 in what is called, the Bible Code. Using very different research methods, I discovered it in the Bible's book of Revelation and Daniel's prophecies. It is one of the most important dates in the plan of God for all humanity!

This is a time line that follows the Annals of the World time line by James Ussher.

"A smart and wonderfully throwback adventure. Philip Pullman fans take notice. Don't miss."
—Matthew Quick, New York Times Bestselling author of *The Silver Linings Playbook* and *Forgive Me, Leonard Peacock*. Nowhere to escape but below. Panic grips sixteen-year-old Mia Kish 's boarding school, Westbrook Academy, when a mysterious quarantine is suddenly enforced by a small army of soldiers who shoot first and ask questions later. The quarantine makes no sense—but then students and faculty inexplicably begin to break down. Their illness is an aggressive virus that ages its victims years in only a matter of hours. The end result? Death. No one can explain what 's going or has any idea what to do. Except Mia. Because she knows something that no one else does. And she knows the only place to escape to get answers...But what she finds may be even more horrific than anything that came before. * " The contemporary implications of the story ring unnervingly true. A fast-paced, thrilling adventure story that begs for a sequel. " —Booklist, starred review "Seth Fishman kills it in every possible way." —Margaret Stohl, New York Times Bestselling co-author of *Beautiful Creatures* and *Icons*. "A crackling thriller that keeps you turning the pages until the very end." —Jennifer Smith, author of *The Statistical Probability of Love at First Sight*.

Curriculum and Teaching Dialogue is the journal of the American Association of Teaching and Curriculum (AATC). An important historical event in the development of organizations dealing with the scholarly field of teaching and curriculum was the founding of the AATC on October 1, 1993. The members of the AATC believed that the time was long overdue to recognize teaching and curriculum as a basic field of scholarly study, to constitute a national learned society for the scholarly field of teaching and curriculum (teaching is the more inclusive concept; curriculum is an integral part of teaching—the "what to teach" aspect). Since that AATC has produced scholarship in teaching and curriculum and serve the general public through its conferences, journals, and the interaction of its members. The purpose of the organization as originally defined in Article 1, Section 2 of the AATC Constitution: " To promote the scholarly study of teaching and curriculum; all analytical and interpretive approaches that are appropriate for the scholarly study of teaching and curriculum shall be encouraged. " Curriculum and Teaching Dialogue seeks to fulfill that mission.
