Effective science teaching requires creativity, imagination, and innovation. In light of concerns about American science literacy, scientists and educators have struggled to teach this discipline more effectively. *Science Teaching Reconsidered* provides undergraduate science educators with a path to understanding students, accommodating their individual differences, and helping them grasp the methods--and the wonder--of science. What impact does teaching style have? How do I plan a course curriculum? How do I make lectures, classes, and laboratories more effective? How can I tell what students are thinking? Why don't they understand? This handbook provides productive approaches to these and other questions. Written by scientists who are also educators, the handbook offers suggestions for having a greater impact in the classroom and provides resources for further research.

A math curriculum designed specifically for homeschoolers.

Literature and Language Teaching is for teachers and trainers who want to incorporate literature into the language classroom. It is suitable for teacher trainers, teacher development groups or teachers working on their own. This book contains tasks and activities which encourage reflection on some of the issues and debates involved in using literature in the language classroom and explore different approaches to using literature with teenage and adult learners at all levels. It suggests criteria for selecting and evaluating materials for classroom use and identifies some of the distinctive features of novels, short stories, poems and plays so that these can be successfully exploited in the classroom. A wide range of practical
