Studies of behavior include: HOW is a behavior triggered or performed. WHY does a behavior occur, what evolutionary processes are at work.

*Answer Key Animal Behavior Chapter 37 - toefl.etg.edu.sv*  
The answer derives from understanding how the sensory-motor mechanisms producing the behaviour are shaped as the dog matures from a puppy into a functional adult animal. Both internal and external factors can shape the behavioral machinery, so understanding the development of the dog's tail-wagging behaviour requires investigating the influence of the dog's genes and its experiences.
