Lab 11 Animal Behavior Introduction: Ethology is the study of animal behavior. An animal's behavior is its response to sensory input. There are three types of behaviors: orientation, agonistic, and mating. Orientation behaviors take the animal to its most favorable environment. Taxis is when an animal moves toward or away from a stimulus. ... Continue reading "Lab 11a Behavior Ap"

To observe animal behavior in this lab, isopods will be isolated in a controlled environment. Isopods, more commonly known as pill bugs, are crustaceans with a hard exoskeleton, seven pairs of legs, and antenna. Drosophila embryos develop in the egg membrane. Once the egg hatches, the new larva emerges and feeds on the medium.
