To launch Solr, run: bin/solr start -e cloud on Unix or MacOS; bin\solr.cmd start -e cloud on Windows. This will start an interactive session that will start two Solr "servers" on your machine. This command has an option to run without prompting you for input (-noprompt), but we want to modify two of the defaults so we won't use that option now.

History. In 2004, Solr was created by Yonik Seelye at CNET Networks as an in-house project to add search capability for the company website.. In January 2006, CNET Networks decided to openly publish the source code by donating it to the Apache Software Foundation. Like any new Apache project, it entered an incubation period which helped solve organizational, legal, and financial issues.
