(Joules are a unit of energy), or as biomass of producers per unit area per year (since the mass of a plant minus the water is proportional to the amount of ...

APES Ecosystem Ecology Flashcards | Quizlet

Ecosystem Ecology An ecosystem is simply a particular location on Earth with interacting biotic and abiotic components.Biotic components are any components of ecosystems that are living, such as plants, animals, and bacteria.Abiotic components are any nonliving parts of ecosystems, like rocks, soil, or even the air we breathe. The combination of all ecosystems on Earth is called the biosphere.

Introduction to Ecosystems | Unit 1: The Living World ...

AP Environmental Science: Ecology Free Response Name \_\_\_\_ Ecosystem Ecology (20 points) 1. The dominant biome in New England is temperate seasonal forest with hardwood trees like oak, hickory, and maple that drop their leaves in the fall. Temperate seasonal forests are relatively moist with stable precipitation but variable temperatures (i.e., cold winters and warm summers).

APES Ecosystems & Ecology - Dave Mundy, North Kitsap High ...

Resistance is a measurement of how much an ecosystem changes after a disruption (forest fire, invasive species...). If there is little change, the ecosystem has a high resistance and is considered to be quite stable. Resilience is the measure of how quickly the ecosystem can 'bounce back' from the disturbance. It is ecosystem recovery time.
