The top of the tree is grafted onto different roots (called a rootstock), and the roots control the size of the tree. Therefore, when you are choosing an apple for a container you must make sure it is grafted onto a container rootstock. Look out for rootstocks called 'M26' for a container.

How to grow apples: RHS advice / RHS Gardening

How to grow apples – harvesting apples If well maintained and fed, an apple tree will mature and crop for decades. Once a year in late winter, apply a balanced fertiliser, such as pelleted chicken manure, around the base of the tree. Encourage good flowering and fruit formation by applying sulphate of potash fertiliser.

How To Grow Apples - BBC Gardeners' World Magazine

Apples thrive in a well-drained loam, at least 60cm (2ft) deep. Add well rotted organic matter before planting and mulch and water well through the growing season until the tree is growing well. Shallow soils over chalk are unsuitable for growing all but a very few apples. Dessert apples need good drainage, but culinary apples are more tolerant.

Apples / RHS Gardening

Apples are the most popular and one of the easiest tree fruit to grow. Although they are usually grown as half standards or bush trees, they can be trained into numerous shapes, which take up very little space - such as espaliers and cordons - so you don't need an orchard to grow several varieties.

How to grow and care for apples | lovethegarden

Apple seeds are easy to grow at home with the proper preparation, and seedlings are often more vigorous than their grafted nursery counterparts. Give an apple tree seedling 3-4 years and it'll catch up to and pass a potted transplant in size. From there, you have a tree that may bear for centuries.

How to Grow Apple Trees From Seed

Apple trees (Malus spp.) are as lovely in bloom as any strictly ornamental flowering tree, and the blooms are also fragrant. But unlike ornamentals, they will give you a delicious harvest of fruit. Nor are the landscaping uses for apple trees limited to their blooming periods.

Learn About the Different Varieties of Apple Trees to Grow

For an apple tree to grow successfully, it will need a spot where it will receive at least 6-8 hours of sun per day. Seedlings or trees should be planted 15-18 feet apart in a row. For the dwarf variety, plant 4-8 feet apart in a row. If you're growing the dwarf variety, make sure to place next to a fence for support.
