This book analyzes the rise of the earliest Greek temples through an innovative phenomenological approach, in which lived experiences are assumed as key tools of investigation. Accordingly, much space is dedicated to exploring the connections that tied the Greeks to their surroundings environment, by surviving records of Greek religion, poetry, art, philosophy and architecture from the archaic times. This framework sheds a new light on the relationship between 'human' and 'divine' in the ancient Greek world, suggesting that the archetypal structure of temple was devised to

facilitate a particular kind of experience, that of the Divine. Such an experience produced a break from ordinary and profane life, allowing a special awareness to be gained. The findings and method of this book enable us to bridge the gap between our present days and that distant era, rediscovering our ancient past as an endless source of inspiration.

This remarkable and monumental book at last provides a comprehensive answer to the age-old riddle of whether there are only a small number of 'basic stories' in the world. Using

a wealth of examples, from ancient myths and folk tales via the plays and novels of great literature to the popular movies and TV soap operas of today, it shows that there are seven archetypal themes which recur throughout every kind of storytelling. But this is only the prelude to an investigation into how and why we are 'programmed' to imagine stories in these ways, and how they relate to the inmost patterns of human psychology. Drawing on a vast array of examples, from Proust to detective stories, from the Marquis de Sade to E.T., Christopher Booker then leads us through the

extraordinary changes in the nature of storytelling over the past 200 years, and why so many stories have 'lost the plot' by losing touch with their underlying archetypal purpose. Booker analyses why evolution has given us the need to tell stories and illustrates how storytelling has provided a uniquely revealing mirror to mankind's psychological development over the past 5000 years. This seminal book opens up in an entirely new way our understanding of the real purpose storytelling plays in our lives, and will be a talking point for years to come.

The bestselling, widely heralded, Jungian introduction to the psychological foundation of a mature, authentic, and revitalized masculinity. Redefining age-old concepts of masculinity, Jungian analysts Robert Moore and Douglas Gillette make the argument that mature masculinity is not abusive or domineering, but generative, creative, and empowering of the self and others. Moore and

Gillette clearly define the four mature male archetypes that stand out through myth and literature across history: the king (the energy of just and creative ordering), the warrior (the energy of aggressive but nonviolent action), the magician (the energy of initiation and transformation), and the lover (the energy that connects one to others and the world), as well as the four immature patterns that interfere with masculine potential (divine child, oedipal child, trickster and hero). King, Warrior, Magician, Lover is an exploratory journey that will help men and women reimagine and deepen their

In *Archetypes of Astrology*, author Ena Stanley blends the themes of planets, signs and houses with their ancient mythological origins in a way that provides a useful and interesting introduction to the basics of astrology for readers who have little or no prior experience with astrological techniques. At the same time, she offers an enriching and enjoyable reading experience for advanced students and professional astrologers, or for readers whose primary interest is mythology. In the opening

chapter, involving the evolution of astrology into the modern day, the reader is drawn in with Stanley's explanation of the patriarchal matrix and the matriarchal matrix and how in modern astrology, both have been blended into a workable paradigm. From there she shares how she began to develop her sense of the twelve basic astrological archetypes through her studies of psychology and of astrology, in particular with Zipporah Dobyns, Ph.D. In the chapters that follow, each of twelve basic archetypes blend astrology with a wealth of imagery through stories of myths that are rich in metaphor, adding new

dimensions to our understanding of the signs, houses and planets of basic astrology. The mythologies behind Sun, Moon and the seven planets are further augmented with the correlations of dwarf planet Ceres and asteroids Pallas, Juno and Vesta with the 6th and 7th archetypes. Additionally, as the author points out in her concluding chapter, the study of myths and archetypes takes us into a greater understanding of motivations and behavior-to the essence of counseling astrology.

Hadot shows how the schools, trends, and

ideas of ancient Greek and Roman philosophy strove to transform the individual's mode of perceiving and being in the world. For the ancients, philosophical theory and the philosophical way of life were inseparably linked. Hadot asks us to consider whether and how this connection might be reestablished today.
