The nation ' s export trade depends largely on the agricultural sector. For example, agricultural commodities such as jute, tobacco, spices, oilseeds, raw cotton, tea as well as coffee accounts for approximately 18% of the entire value of exports of a country.

Why is Agriculture Important and its Role in Everyday Life.

Agriculture is the science and art of cultivating plants and livestock. Agriculture was the key development in the rise of sedentary human civilization, whereby farming of domesticated species created food surpluses that enabled people to live in cities. The history of agriculture began thousands of years ago. After gathering wild grains beginning at least 105,000 years ago, nascent farmers ...

Agriculture - Wikipedia

Agriculture in the United Kingdom uses 69% of the country's land area, employs 1.5% of its workforce (476,000 people) and contributes 0.6% of its gross value added (£9.9 billion). The UK produces less than 60% of the food it consumes. Agricultural activity occurs in most rural locations, it is concentrated in East Anglia (for crops) and the South West (livestock).
