Inventory control is exercised through inventory audits and cycle counts. An inventory audit essentially comprises of auditing the books stocks and transactions and matching physical stocks with the book stock. Cycle counts: Cycle count refers to the process of counting inventory items available in physical locations. Depending upon the nature of inventory, number of transactions and the value of items, cycle count can be carried on periodically or perpetually.

Management / Royal Canadian Mounted Police

Inventories are normally considered as significant accounts per audit perspective. This is because inventory normally has large amounts at the reporting date as well as nature is sensitive compared to other assets. The fraud over inventories is likely to happen by staff or managements due to this sensitivity.
