demand stabilization, the Phillips curve and monetarist macroeconomics. Over four-hundred solved and supplementary problems are included.

This title presents an analysis of the moral and social dimensions of microeconomic behaviour, questioning the application of standard neo-classical assumptions to communities with widespread disparity of income.

The new edition of A Textbook of Business Mathematics inches on its earlier editions and continues to provide a comprehensive coverage of important topics and concepts in business mathematics. The text integrates the standard curriculum and the manifold requirements of undergraduate business maths students.

This book has been written specifically for the students of BCom (Hons) of the University of Delhi in accordance with its prescribed syllabus and that of School of Open Learning. Its basic features are the same as the mother book Cost Accounting—Principles and Practice, which is a UGC recommended text for the last many years. Thus, it gives a thorough grounding in cost concepts, cost behaviour, and costing methods. The subject matter has been organized on “first things first” basis to sustain the interest of the students. Every discussion involving conceptual difficulties is immediately followed by a numerical example.

Bengal. Developed as per the latest CBCS syllabus of University of Calcutta, the book is divided into three modules: Module I for Microeconomics, Module II for Statistics and Module III dedicated to model question papers. Written in a lucid manner, it conveys the essential concepts and tools needed to develop and nurture economic and statistical thinking.

The analytical approach of standard health economics has so far failed to sufficiently account for the nature of care. This has important ramifications for the analysis and valuation of care, and therefore for the pattern of health and medical care provision. This book sets out an alternative approach, which places care at the center of an economics of health, showing how essential it is that care is appropriately recognized in policy as a means of enhancing the dignity of the individual. Whereas traditional health economics has tended to eschew value issues, this book embraces them, introducing care as a normative element at the center of theoretical analysis. Drawing upon care theory from feminist works, philosophy, nursing and medicine, and political economy, the authors develop a health care economics with a moral basis in health care systems. In providing deeper insights into the nature of care and caring, this book seeks to redress the shortcomings of the standard approach and contribute to the development of a more person-based approach to health and medical care in economics. Health Care Economics will be of interest to researchers and postgraduate students in health economics, heterodox economists, and those interested in health and medical care.

Economics is a broad and diverse discipline, but most economics textbooks only cover one way of thinking about the economy. This book provides an accessible introduction to nine different approaches to economics: from feminist to ecological and Marxist to behavioural. Each chapter is written by a leading expert in the field described and is intended to stand on its own as well as providing an ambitious survey that seeks to highlight the true diversity of economic thought. Students of economics around the world have begun to demand a more open economics education. This book represents a first step in creating the materials needed to introduce new and diverse ideas into the static world of undergraduate economics. This book will provide context for undergraduate students by placing the mainstream of economic thought side by side with more heterodox schools. This is in keeping with the Rethinking Economics campaign which argues that students are better served when they are presented with a spectrum of economic ideas rather than just the dominant paradigm. Rethinking Economics: An Introduction to Pluralist Economics is a great entry-level economics textbook for lecturers looking to introduce students to the broader range of ideas explored within the economics profession. It is also appropriate and accessible for people outside of academia who are interested in economics and economic theory.
