Bachelor in International Business Management, Ghent ...

The degree for international business TBS Bachelor in Management is an officially recognized French higher education degree in the field of international business and business administration, with a strong focus on management and marketing.

Developed using extensive lecturer and student feedback, International Business and Management acknowledges recent changes in course emphasis and presents an integrated treatment of international management problems. Combining a strong strategic focus with coverage of the functions that underpin global business, it delivers a fresh European perspective on international business, expressly written for post-introductory undergraduate courses and also for MBA students. All of the key areas of international business are covered within this managerial framework, including important topics rarely covered in older textbooks such as: SMEs and how they compete on a global level; ethics and social responsibility; and technology and how organizations use information to support global operations and deliver competitive advantage. Kelly also includes constructive and genuinely international examples, showing how SMEs through to MNCs have grappled with the operational and organizational challenges of international business. Eye-catching real-world case studies, market researched pedagogy, and a strong theoretical backbone ensure that Kelly: International Business and Management is at the forefront of European IB textbooks.

Transcultural management ; Management styles ; Intercultural communication.

CreditRisk+ is a widely implemented default-mode model of portfolio credit risk, based on a methodology borrowed from actuarial mathematics. This book gives an account of the status quo as well as of new and recent developments of the credit risk model CreditRisk+, which is widely used in the banking industry. It gives an introduction to the model itself and to its ability to describe, manage and price credit risk. This timely book will be an indispensable tool.

"This custom publication for La Trobe university covers a range of important introductory financial and accounting topics. Included in this text are financial position and performance, cash flows, ethics and teamwork, time value of money, risk and return, management decisions, funding, budgeting and investment." -- publisher's website.

Reflecting a strong managerial orientation, a corporate emphasis, and a true global-local focus, International Business: Managing Globalization explains the 'whats' and 'whys' of global differences as it covers industries, competitors, regions, and markets from the perspectives of practicing managers. Author John S. Hill reviews the geographic and historic backgrounds of regions and markets in a way that no other text has done, with special focus on global supply chains, global branding, and world religions as they affect management at the local level. It integrates business topics and environmental analysis into a strategic, global-local framework. It places current events in focus by covering history and geography as they affect international business. It includes a unique chapter on global industry and competitor analysis, a common business tool, but a topic not covered in other texts. It covers religion as a key determiner of behaviors worldwide to help readers understand why behaviors differ depending on the local context. It focuses on corporate analysis, planning, and internationalization, vital corporate practices rarely covered in other textbooks. It includes short cases for undergraduates and longer cases for graduate students. International Business: Managing Globalization is ideal for the introduction to business course or for courses focusing on international or global business strategy

The ACADEMY OF INTERNATIONAL BUSINESS (UK and Ireland Chapter) Published in association with the UK and Ireland Chapter of the Academy of International Business. This brand new edited collection addresses the growing uncertainty and socio-economic challenges of globalisation and its profound implications for the strategies and operations of multinational enterprises (MNEs). Responding to the new balance in international business, the authors offer valuable insights into the co-evolutionary processes involved in headquarters-subsidiary relationships, the need for novel strategies by MNEs to retain competitive advantage, improve performance and contribute to the global economy.

Mit einem Geleitwort von Dr. Lothar Sp\u00e4th, Vorsitzender der Gesch\u00e4ftsf\u00fchrung der Jenoptik, Jena

Finance is widely seen as an obstacle to a better world. Principles of Sustainable Finance explains how the financial sector can be mobilized to counter this. Using finance as a means to achieve social goals we can divert the planet and its economy from its current path to a world that is sustainable for all. Written for undergraduate, graduate, and executive students of finance, economics, business, and sustainability, this textbook combines theory, empirical data, and policy to explain the sustainability challenges for corporate investment. It shows how finance can steer funding to certain companies and projects without sacrificing return and thus speed up the transition to a sustainable economy. It analyses the Sustainable Development Goals as a strategy for a better world and provides evidence that environmental, social, and governance factors matter, explaining in detail how to incorporate these factors in the corporate and financial sectors. Tailored for students, Principles of Sustainable Finance starts each chapter with an overview and learning objectives to support study. It includes suggestions for further reading, lists and definitions of key concepts, and extensive uses of figures, boxes, and tables to enhance educational goals and clarify concepts. Principles of Sustainable Finance is also supported by an online resource that includes teaching materials and cases.
