Bacteriology determining the identity of prokaryotic organisms, emphasizing bacterial species, using every characterizing aspect. The manual was published subsequent to the Bergey's Manual of Determinative Bacteriology, though the latter is still published as a guide for identifying unknown bacteria. First published in 1923 by David Hendricks Bergey, it is used to classify bacteria based on their structural and functional attributes by ...

Bacteriology is a departure from past editions that attempted, usually inadequately, to combine systematic and determinative information. Systematic information will continue to be found in Bergey's Manual of Systematic Bacteriology, with the Determinative manual serving as a reference to aid in the identification of unknown bacteria.
