This second edition of a GCSE computer studies text includes chapters on personal computers and desktop publishing, spreadsheets and their applications, and detailed case studies illustrating how a computer system can revolutionize the working environment. The Data Protection Act is also included, together with project work, an extended section on coursework, advice on how to revise and hints on how to pass examinations. Key words are explained in the text in context and highlighted with bold type, and also explained in an extensive glossary.

This longitudinal, qualitative, multi-case study examines the mathematical experiences of three Bahamian students pursuing science degrees in American universities and its relationship to their previous mathematical experiences in their Bahamian high schools. Drawing on cultural psychology and sociocultural theories of learning, this study found that the relationship between the academic preparedness of the participants on their experiences with collegiate mathematics is not limited to subject content only. The lessons learnt from the implied curriculum also play a role in their experiences with collegiate mathematics. Of the three participants, two have had to learn/develop techniques for studying because they had not been sufficiently challenged in their previous environments to do so. Each of the cases also highlights some powerful constructs needed for success in mathematics and at least two emphasize making connections between concepts, procedures, manipulatives/tools and multiple approaches when solving problems. This study contributes to an emerging area of research on student persistence in college-level mathematics courses as well as to the ongoing discussions in mathematics education regarding the role/importance of conceptual understanding and how to promote it. The study makes visible some of the ways in which students' post-secondary experiences with mathematics are shaped by their perception of their mathematical preparation, thus providing a basis for discussions of possible curricular change in the Bahamas. It also suggests that issues such as confidence and school/teacher expectations of students may play a role in the development of conceptual understanding.

GCSE Chemistry features relevant up-to-date material, including Internet research activities, photos, diagrams and illustrations in full colour. The revised second edition includes expanded coverage of the development of scientific ideas, as well as further information on topics such as instrumental techniques for identifying elements and compounds, the effects of plate tectonics, colloids and carboxylic acids. There is additional material on the technological applications of chemistry, and questions have been updated.

The book is a cutting-edge contribution to the debate which has occurred for some time on the pros and cons of secondary education becoming more closely and explicitly related to preparing young people for the world of work. The book provides concrete examples of the vocationalisation of secondary education, with particular reference to the situation in Africa. The target audience for the book includes policy-makers, practitioners, administrators, education planners, researchers, teachers and teacher educators with a concern about the relationship between secondary education and education for the world of work (with particular reference to technical and vocational education and training - TVET.) The book appears in the Springer book series on 'Technical and Vocational Education and Training: Issues, Concerns and Prospects' and compliments the 'International Handbook of Technical and Vocational Education and Training' and other publications in the 'International Library of TVET' all of which are publications of the 'UNESCO-UNEVOC International Centre for TVET' in Bonn, Germany

The ideal companion for students taking the Bahamas GCSE English language examination. Provide expert guidance on how to master the skills necessary in the examination with this companion which has been written in conjunction with the Ministry of Education, Youth, Sports and Culture. - Build and consolidate knowledge with an opening chapter summarising current grammar and sentence construction, correct spelling, word choice and punctuation. - Prepare students for the exam with chapters providing guidance on Continuous Writing (Paper 1), Listening Skills (Paper 2) and Comprehension and Directed Writing (Papers 3and 4). - Send students into the exam with confidence with activities to test skills, 'exam-type' exercises, student answers and comments from examiners, as well as practice examination papers and answers.
