sciences. The new Ninth Edition builds on the straightforward writing style, practical applications from a variety of disciplines, clear step-by-step problem solving techniques, and comprehensive exercise sets that have been hallmarks of Hoffmann/Bradley's success through the years.

This brief edition attempts to retain the straightforward style, intuitive approach, and applications of the author's book *Calculus for business, economics and the social and life sciences* 5th ed. As a shorter book, Algebra review has been moved from the appendix to a new opening chapter which includes worked examples and practice problems. Presented in a full colour design, the visual appeal should benefit students who think geometrically rather than linearly.

Calculus for Business, Economics, and the Social and Life Sciences, Brief Edition introduces calculus in real-world contexts and provides a sound, intuitive understanding of the basic concepts students need as they pursue careers in business, the life sciences, and the social sciences. The new Ninth Edition builds on the straightforward writing style, practical applications from a variety of disciplines, clear step-by-step problem solving techniques, and comprehensive exercise sets that have been hallmarks of Hoffmann/Bradley's success through the years.

The author team of Dave Sobecki, Angela Matthews, and Allan Bluman have worked together to create the second edition of *Mathematics in Our World*, an engaging text catered to the needs of today's liberal arts mathematics students. This revision focuses strict attention to a clear and friendly writing style, integration of numerous relevant real-world examples and applications, and implementation of the step-by-step approach used for years in Bluman's *Elementary Statistics: A Step by Step Approach*. The result is an exceptionally engaging text that is able to both effectively and creatively convey the basic concepts fundamental to a liberal arts math curriculum for even the most hesitant student.
