What is Cerebro Vascular Disease? The word cerebrovascular is made up of two parts – "cerebro" which refers to the large part of the brain, and "vascular" which means arteries and veins. Together, the word cerebrovascular refers to blood flow in the brain. Cerebrovascular disease (CVD) refers to any abnormality in the brain caused by problems with the blood vessels.

[NHSGCC - What is Cerebro Vascular Disease?](#)

Most cerebrovascular disease can be at least partially improved by lowering cholesterol, controlling blood pressure and diabetes and quitting smoking. this may require prescription medications or lifestyle changes, such as exercise and healthy eating, but the benefit of preventing a stroke is well worth it.

[What You Should Know About Cerebrovascular Disease](#)

Cerebrovascular diseases are conditions caused by problems that affect the blood supply to the brain. Types of cerebrovascular disease There are a number of different types of cerebrovascular disease. The four most common types are:

[NHS 111 Wales - Encyclopaedia - Cerebrovascular disease](#)

Cerebrovascular disease is not only one disease. Instead, it ' s a group of diseases, disorders, and conditions that affect your blood vessels and blood supply to the brain, including stroke, vascular malformation, aneurysm, and transient ischemic attack (TIA).

[Cerebrovascular Disease: Causes, Symptoms & Support Strategies](#)

Cerebrovascular disease includes a variety of medical conditions that affect the blood vessels of the brain and the cerebral circulation. Arteries supplying oxygen and nutrients to the brain are often damaged or deformed in these disorders. The most common presentation of cerebrovascular disease is an ischemic stroke or mini-stroke and sometimes a hemorrhagic stroke. Hypertension is the most important contributing risk factor for stroke and cerebrovascular diseases as it can change the structure

[Cerebrovascular disease - Wikipedia](#)

The term 'Cerebrovascular Disease' is used to describe cognitive problems that are associated with problems in the circulation of the blood to the brain (cerebrovascular disease). The term ' Multi Infarct Dementia ' is sometimes used to refer to this condition. What are the symptoms of Cerebrovascular Disease?

[Cerebrovascular disease information sheet](#)

Cardiovascular disease (CVD) is a general term for conditions affecting the heart or blood vessels. It's usually associated with a build-up of fatty deposits inside the arteries (atherosclerosis) and an increased risk of blood clots. It can also be associated with damage to arteries in organs such as the brain, heart, kidneys and eyes.

[Cardiovascular disease - NHS](#)

Like all organs, the brain needs the oxygen and nutrients provided by blood to function properly. If the supply of blood is restricted or stopped, brain cells begin to die. This can lead to brain injury, disability and possibly death. There are 2 main causes of strokes:

[Stroke - NHS](#)

Cerebrovascular disease is defined as neurological deficits due to arterial insufficiency or occlusion, venous occlusive disease, or hemorrhage with usually focal deficits that may be multifocal in recurrent disease. From: Systemic Lupus Erythematosus (Fourth Edition), 2004
