CHAPTER 10 Cash Flows and Other Topics in Capital Budgeting ANSWERS TO END-OF-CHAPTER QUESTIONS 10-1. We focus on cash flows rather than accounting profits because these are the flows that the firm receives and can reinvest. Only by examining cash flows are we able to correctly analyze the timing of the benefit or cost. Also, we are only interested in these cash flows on an after tax basis as ...

Chapter 10 Capital Budgeting
Since capital budgeting projects are long-term investments, the cash flows which they generate are likely to take place years into the future. If a firm spends $1000 today and receives back $100 per year over the next 10 years, they have not broken even. Instead, the project has caused a significant reduction in firm value.

Chapter 8 -Introduction to Capital Budgeting – Business ...
The capital budgeting is very important to firm's future. The difference between capital budgeting and individual's investment decisions are in the estimation of cash flows, risk, and determination of the appropriate discount. B - The difference between interdependent and mutually exclusive projects is that the independent project's cash flows are not affected by the acceptance of the other, although the mutually exclusive can be adversely impacted by the acceptance of the other. the ...
