Mental health conditions, such as childhood epilepsy, developmental disabilities, depression, anxiety and behavioural disorders, are major causes of illness and disability among young people. Worldwide, 10-20% of children and adolescents experience mental health conditions, but the majority of them do not seek help or access care.

Key facts. One in six people are aged 10-19 years. Mental health conditions account for 16% of the global burden of disease and injury in people aged 10-19 years. Half of all mental health conditions start by 14 years of age but most cases are undetected and untreated (1). Globally, depression is one of the leading causes of illness and disability among adolescents.
