Ancient Chinese Architecture - Ancient History Encyclopedia

The architecture of China is as old as Chinese civilization. From every source of information—literary, graphic, exemplary—there is strong evidence testifying to the fact that the Chinese have always enjoyed an indigenous system of construction that has retained its principal characteristics from prehistoric times to the present day.

Chinese Architecture in an Age of Poststructuralism | A ...

Chinese renaissance architecture is an aesthetic created by a group of primarily American-trained, first-generation Chinese architects who formed a movement for the rejuvenation of Chinese architecture in modern China.

Chinese renaissance architecture in China and Hong Kong ...

Because the Chinese built chiefly in timber, which is vulnerable to moisture, fire, insects, and the ravages of time, very little ancient architecture has survived. The oldest datable timber building is the small main hall of the Nanchan Temple, on Mount Wutai in Shanxi province, built sometime before 782 ce and restored in that year.

columns to the frame of the roof. Dougong was widely used in the ancient Chinese during the Spring and Autumn period and developed into a complex set of interlocking parts by its peak in the Tang and Song periods. The piec

Dougong - Wikipedia

Ancient Chinese architecture is mainly timberwork. Wooden posts, beams, lintels and joists make up the framework of a house. Walls serve as the separation of rooms without bearing the weight of the whole house, which is unique to China. As a famous saying goes, 'Chinese houses will still stand when their walls collapse.'
