To IIS users: if you hide the Server HTTP header, the auto method won't detect IIS, in that case it is advised you explicitly use the refresh method. Note When the location method is used, an HTTP status code of 303 will automatically be selected when the page is currently accessed via POST and HTTP/1.1 is used.

`echo base_url();` This function returns the same thing as `site_url ()`, without the `indexPage` being appended. Also like `site_url ()`, you can supply segments as a string or an array. Here is a string example: `echo base_url('blog/post/123');` The above example would return something like:
`http://example.com/blog/post/123.`

In *The Developer's Guide to Social Programming*, Mark Hawker shows developers how to build applications that integrate with the major social networking sites. Unlike competitive books that focus on a single social media platform, this book covers all three leading platforms: Facebook, OpenSocial, and Twitter. Hawker identifies the characteristics of superior, highly engaging social media applications, and shows how to use the Facebook platform, Google Friend Connect, and the Twitter API to create them. You'll find practical solutions and code for addressing many common social programming challenges, from site registration to search, blog commenting to creating location-

CakePHP is a leading PHP-based web app development framework. When asking a question on forums or chat rooms, many CakePHP beginners get little help from the experts. Simple questions can get a response like, “ Well, just read the online manual and API. ” Unfortunately, the online manual is depreciated, and who wants to absorb a programming language or framework from an API?

Beginning CakePHP will do the following: Lead you from a basic setup of CakePHP to building a couple applications that will highlight CakePHP ' s functionality and capabilities without delving too deeply into the PHP language, but rather what the CakePHP framework can offer the developer. Teach
