Cognitive behavioral therapy designed for children with ASD yielded significantly lower anxiety scores on the primary outcome measure than standard-of-practice CBT and treatment as usual; both types of CBT yielded higher rates of positive treatment response than treatment as usual.

Cognitive Behavioral Treatments for Anxiety in Children ...

Psychological therapies, particularly cognitive behavioral therapy (CBT), effectively reduce anxiety in patients with anxiety disorders , yet such therapies have not been tested for treatment of anxiety in pregnant women. Despite a great need for effective, non-pharmacological interventions, research specifically addressing treatment of anxiety disorders during pregnancy is seriously lacking, with no published studies of psychotherapeutic treatments for anxiety in pregnancy to date.
