Contrastive analysis does not provide for the possibility that the learner actively sets about the learning task, but rather sees the learner as a passive recipient of language interference operating in a mechanistic fashion outside the learner's control. Secondly, contrastive analysis assumed that error derives exclusively from first language interference. Error analysis studies, however, have indicated that certain errors recur among language learners of

Via contrastive analysis, problems can be predicted and considered in the curriculum. However, not all problems predicted by contrastive analysis always appear to be difficult for the students. On the other hand, many errors that do turn up are not predicted by contrastive analysis. A counter-theory to contrastive analysis is error analysis.

As the weak version of CAH can be used to identify errors, CA needs to walk hand in hand with error analysis (EA). First actual errors must be identified by analyzing a corpus/discourse of L1. Then a contrastive analysis can be used to establish which error in the corpus can be put down to find the difficulties between L1 and L2.
