This collection examines how Romania's religious majority and its most significant religious minority fared under Communism. The contributors also analyze the post-Communist period and argue that little elite renewal has taken place.

Collection of selected, peer reviewed papers from the International Conference on Innovative Manufacturing Engineering (IManE), May 23-24, 2013, Iași, Romania. Volume is indexed by Thomson Reuters CPCI-S (WoS). The 177 papers are grouped as follows: Chapter 1: Advanced Machining and Surface Engineering, Assembling Technologies; Chapter 2: Forming Technologies; Chapter 3: Non-Conventional Technologies in Manufacture and Industry, Welding Technologies; Chapter 4: Advanced Materials and Construction Technologies; Chapter 5: Flexible Manufacturing, Automation and Robotics in Technological Processes; Chapter 6: CAD/CAM/CAE/CAX Technologies, Manufacturing Optimization; Chapter 7: Mechanical and Manufacturing Equipment, Devices and Instrumentation, Design and Analysis; Chapter 8: Innovation, Creativity, Learning and Education in Engineering; Chapter 9: Industrial and Product Management, Quality and Evaluation.

The refereed proceedings of the 12th Asia-Pacific Computer Systems Architecture Conference are presented in this volume. Twenty-six full papers are presented together with two keynote and eight invited lectures. Collectively, they represent some of the most important developments in computer systems architecture. The papers emphasize hardware and software techniques for state-of-the-art, multi-core and multi-threaded architectures.

Social media increasingly shapes the way in which we perceive conflicts and conflict parties abroad. Conflict parties, therefore, have started using social media strategically to influence public opinion abroad. This book explores the phenomenon by examining, (1) which strategies of external communication conflict parties use during asymmetric conflicts and (2) what shapes the selection of these communication strategies. In a comprehensive case study of the conflict in Israel and Palestine, Bernd Hirschberger shows that the selection of strategies of external communication is shaped by the (asymmetric) conflict structure.

Bees provide a critical link in the maintenance of ecosystems, pollination. They play a major role in maintaining biodiversity, ensuring the survival of many plants, enhancing forest regeneration, providing sustainability and adaptation to climate change and improving the quality and quantity of agricultural production systems. In fact, close to 75 percent of the world's crops that produce fruits and seeds for human consumption depend, at least in part, on pollinators for sustained production, yield and quality. Beekeeping, also called apiculture, refers to all activities concerned with the practical management of social bee species. These guidelines aim to provide useful information and suggestions for a sustainable management of bees around the world, which can then be applied to project development and implementation.

Amazons—fierce warrior women dwelling on the fringes of the known world—were the mythic archenemies of the ancient Greeks. Heracles and Achilles displayed their valor in duels with Amazon queens, and the Athenians reveled in their victory over a powerful Amazon army. In historical times, Cyrus of Persia, Alexander the Great, and the Roman general Pompey tangled with Amazons. But just who were these bold barbarian archers on horseback who gloried in fighting, hunting, and sexual freedom? Were Amazons real? In this deeply researched, wide-ranging, and lavishly illustrated book, National Book Award finalist Adrienne Mayor presents the Amazons as they have never been seen before. This is the first comprehensive account of warrior women in myth and history across the ancient world, from the Mediterranean Sea to the Great Wall of China. Mayor tells how amazing new archaeological discoveries of battle-scarred female skeletons buried with their weapons prove that women warriors were not merely figments of the Greek imagination. Combining classical myth and art, nomad traditions, and scientific archaeology, she reveals intimate, surprising details and original insights about the lives and legends of the women known as Amazons. Provocatively arguing that a timeless search for a balance between the sexes explains the allure of the Amazons, Mayor reminds us that there were as many Amazon love stories as there were war stories. The Greeks were not the only people enchanted by Amazons—Mayor shows that warlike women of nomadic cultures inspired exciting tales in ancient Egypt, Persia, India, Central Asia, and China. Driven by a detective's curiosity, Mayor unearths long-buried evidence and sifts fact from fiction to show how flesh-and-blood women of the Eurasian steppes were mythologized as Amazons, the equals of men. The result is likely to become a classic.

This book presents the proceedings of the 1st International Symposium on Intelligent and Distributed Computing, IDC 2007, held in Craiova, Romania, October 2007. Coverage includes: autonomous and adaptive computing; data mining and knowledge discovery; distributed problem solving and decision making; e-business, e-health and e-learning; genetic algorithms; image processing; information retrieval; intelligence in mobile and ubiquitous computing.
