Db2 Cloning Tool for z/OS® (also referred to as Db2 Cloning Tool) makes it easy to quickly clone a Db2 subsystem or a Db2 table space.

Db2 Cloning Tool can also be used to clone non-Db2 volumes. What's new in Db2 Cloning Tool This section describes recent technical changes to Db2 Cloning Tool.

Toolrenames and
catalogs the data sets on
the cloned volumes,

fixes the volume internals, and updates the Db2 internals so

Db2 Cloning Tool V3.2 - What does Db2 Cloning Tool do? DB2 for z/OS Cloning Tool. Jim McAlpine. DB2 for z/OS Cloning Tool December 7, 2010 10:17 AM I'm RTFM for the above with particular reference to

the Table Space Cloning
feature. I want to take
an existing set of
tablespaces/tables and
create a complete new
set with just a new
hlq/vcat in the same
DB2 subsystem. ...

IDUG : Forums : DB2
for z/OS Cloning Tool
Although the ALTER
TABLE syntax is used
to create a clone table,

the authorization that is granted as part of the clone creation process is the same as you would get during regular CREATE TABLE processing. The schema for the clone table will be the same as for the base table. The base table must meet the following requirements:

DB2 10 -

Administration - Creating a clone table Specifies that Db2 will generate a value for the column when a row is inserted into the table. ALWAYS is the recommended value unless you are using data propagation. BY DEFAULT Specifies that Db2 will generate a value for the column when a row is inserted

unless a value was specified for the column on the data change statement.

Db2 12 - Db2 SQL - ALTER TABLE A DB2 for z/OS DBA contacted me a few days ago and posed a seemingly simple question, the answer to which ended up being a little more involved than

might be expected. The DBA's query: how can one alter a table that has a clone? The specific need in this case was to add a column to a table for which a clone had been created.

Robert's Db2 blog: DB2 for z/OS: Clone Tables and "Active ...
If both, source and target are one and the

same OS and database type (e.g. DB2 z/OS ÆDB2 z/OS) ÆHomogeneous System Copy (aka. HSC) BTW If the target is different (e.g. DB2 LUW ÆDB2 z/OS) ÆHeterogeneous System Copy (not addressed today)

Cloning - What's new and faster? These Db2 cloning and

fast refreshing tools automate and speed database, tablespace, table, and full subsystem provisioning. Simply select the source items, select the target and click to execute. Intelligent structure checking and automation does the rest. Create or refresh environments, save time and meet end user needs

with dispatch.

IBM DB2 Cloning Tool: Deprecation of Tablespace ...
 Bottom Line Cloning DB2 systems isn t

rocket science, but a complex and error -prone process. •Familiarize yourself with these procedures and define an easy to use step by step guide. •Tools that supervise, manage and optimize cloning lead to •More flexibility •Higher degree of automation •Exploitation of latest storage technology and

DB2 features "Highest efficiency

Cloning - What's new and faster?
IBM DB2 CLONING TOOL FOR Z/OS © 2013 IBM Corporation The stored procedure will return to the caller, when the requested cloning has ended, either in success or failure It can be called

from a platform other than z/OS to clone an entire z/OS DB2 subsystem End users can initiate their own re-cloning if desired 22

IBM DB2 Cloning Tool for z/OS
Db2 12 for z/OS support for z/OS data set encryption Customers have been telling us that they lack adequate

safeguards to protect data in Db2 for z/OS from viewing by unauthorized internal personnel. In Db2 11 for z/OS, we address that problem by introducing enhancements that provide a simple, transparent, and consumable approach to enabling pervasive encryption of data at rest.

Db2 for z/OS & Tools - The World of DB2 The IBM Db2 Cloning Tool (Cloning Tool) moves Db2 for z/OS objects and data like an earthmover moves land, while performing some very precise and surgical checks and updates. If you are not familiar with the product, the highest-

level descriptions would be to: Create clones of entire Db2 subsystems/data sharing groups.

IBM Db2 Cloning Tool: Previewing a New Face for a Powerful ...
CLONE Tables [DB2 9 for z/OS] This new feature in DB2 V9 might sound like an old monster movie

(Invasion of the Clone Tables!!!), but it is actually a nifty new capability for managing DB2 data availability. Cloning is basically a method of entirely refreshing all of the rows of a table while maintaining availability to the table.

quickly. The tool allows
Customers to clone
entire Db2 systems or
table spaces and

indexes, using fast or
slow copy replication
methods.

Database — zSystems
Db2 | CDT Services
This IBM Redbooks
publication shows the
different techniques
customers can use to
clone their DB2 system.
Although the scenarios
in the book use an SAP
workload, the DB2

cloning techniques we describe are not specific to SAP. Those techniques can apply to any DB2 system and the applications running on that DB2.
