The preferred size of a parking space is 5.5m x 2.9m. When the parking space is located in front of a garage, the long dimension should be 6m so as to allow space to open the garage door. A vehicle and pedestrian sight-splay of 1.5m x 1.5m will typically be required so as to give clear visibility above a height of 600mm where the parking space abuts the rear edge of the footway.

### Residents Parking | Essex Design Guide

Parking Know How Bay Size July 2016. Off-street bays. When assessing the area needed for staff and customer parking, it should be noted that the current UK norm for parking spaces is 2.4 metres wide by 4.8 metres long. The space for manoeuvring (roadways) between bays is six metres. These dimensions are neither minimum nor written in tablets of stone, and may be revised to suit your particular needs, but remember that good access and wider bays aids efficient use of the parking area.

### Parking Know-How Bay Sizes

Worldwide parking standards exist which specify recommended parking space sizes and bay dimensions. Country - North American cars are slightly bigger and so require larger parking bays, larger roadways and wider parking space sizes. Size of Land - A smaller area of land may demand smaller car parking bays for efficiency

### Car Parking Bays | Parking Lot Dimensions | Parking Space Size

In practice, while 7.5 feet in width may be adequate for compact parking spaces, 8.5 feet is a more common width as it better accommodates wider cars. Some parking spaces are specifically designed for parallel parking, though these are typically situated along streets and may accompany meters.
