The Chatterbugs Manual is a practical resource for all those supporting the development of the foundation communication skills of attention and listening, turn-taking and early vocabulary in children. The Chatterbugs programme has been designed to bridge the gap between education and specialist speech, language and communication provision, specifically with Early Years mainstream settings in mind. It enables school staff to prepare children—including those with delayed communication skills, EAL learners, or children with suspected special education needs—for learning in school by developing their communication skills through the use of robust communication strategies. The Chatterbugs Manual contains:
■ An overview of the programme, including step-by-step instructions on how to plan and deliver a Chatterbugs session
■ Guidance on identifying children likely to benefit from the programme
■ Progress Tracking documents, along with information on measuring outcomes
■ Child-friendly, illustrated session resources
■ Frequently Asked Questions
■ A parent-friendly information leaflet
■ Information on models of implementation
■ Information on accessing training and support
Developed by an experienced speech and language therapist, Chatterbugs has consistently recorded successful outcomes for over 80% of participants since the programme's inception in 2012, and for over 90% of participants since 2016. With its hands-on approach, the programme is an essential resource for educators, support staff, and speech and language therapists working with Early Years children.

How ambitious are you for your children to think independently, trust themselves, enjoy what they do, and achieve their goals? Do you want them to be successful, self-confident, and yet not entitled? Undoubtedly, the answer is yes. Most of us are not taught to parent or have been poorly parented ourselves, so how can we expect to parent well? In order to overcome this “parenting education deficit,” struggling parents often turn to books but end up with a pile next to their beds, each one describing only a small portion of what they require. Well, here’s a book that provides answers, the How do we do this? It covers care-giving from the womb all the way to when the child is ready to leave home. Inside, you’ll find well researched facts, revelatory tips, active practices to apply, and a huge array of examples, processes, and procedures on how to be the parent you want to be. What’s more, it’s a set of guidelines and tools you can give to any of your child’s caregivers as a manual to follow on how you’d like your children to be raised when you’re not around. In the style of the old computer manuals, in which a table of contents shows you where to look for what you need, The Practice of Parenting is a one-stop shop to help parents and caregivers resolve the myriad of issues they will encounter in child care, while providing a multitude of ways to help them cope. For bulk sales and interest please see www.practiceofparentingmanual.com

The book consists of 20 chapters, each addressing a certain aspect of human-computer interaction. Each chapter gives the reader background information on a subject and proposes an original solution. This should serve as a valuable tool for professionals in this interdisciplinary field. Hopefully, readers will contribute their own discoveries and improvements, innovative ideas and concepts, as well as novel applications and business models related to the field of human-computer interaction. It is our wish that the reader consider not only what our authors have written and the experimentation they have described, but also the examples they have set.

Designed after the most internationally recognizable temple for the Church of Jesus Christ of Latter-day Saints, this model attempts to replicate as much of the exquisite detail found on the Salt Lake Temple as possible. In addition to replicating the castle-like battlements this model also includes the 1966 building addition that houses additional sealing rooms. Children and adults alike will love assembling this beloved building over and over again. Using only 220 pieces over 34 steps, this model was meticulously planned and designed to be an easily recognizable representation of the Salt Lake Temple while also providing the challenge and fun people are looking for in a building toy. Please Note! This is the instruction manual only. Does not include bricks. Also, colors of bricks shown in manual may be different from those available.

Calling All Tinkerers, Experimenters & Inventors! Unleash Your Creative Powers with Exciting LEGO® Innovations Use science and engineering to transform your bin of LEGO® bricks into amazing, movable toys, machines and gadgets. Bestselling author Sarah Dees is back with an all-new collection of projects featuring ingenious designs and simple scientific principles that real engineers use every day. Make yourself a robot pal whose legs move as he rolls along, or a drummer who really plays the drums. Build a wind-up car complete with a flywheel that'll send your minifigures zooming. Or challenge your friends to a game of pinball on a LEGO® pinball machine you built from scratch. Each project is cooler than the next! It's easy and fun to build each of these awesome contraptions and games by following the clear step-by-step instructions and photographs. Think you have a different way to build something? Exercise your inventing muscles and tinker away! You're in charge of your designs, so experiment and tweak to make your inventions personal to you. No matter what you end up creating, you'll learn exciting new things about science, impress your family and have a blast along the way.

This complete guide to LEGO® Therapy contains everything you need to know in order to set up and run a LEGO® Club for children with autism spectrum disorders or related social communication difficulties and anxiety conditions. By providing a joint interest and goal, LEGO® building can become a medium for social development such as sharing, turn-taking, making eye-contact, and following social rules. This book outlines the theory and research base of the approach and gives advice on all practical considerations including space, the physical layout of the room and choosing and maintaining materials, as well as strategies for managing behaviour, further skill development, and how to assess progress. Written by the pioneer of the approach alongside those who helped form it through their research and evaluation, this evidence-based manual is essential reading for professionals working with autism who are interested in running a LEGO® Club or learning more about the therapy.

Find hidden toys, pirates, ghosts and more in fantastic scenes based on classic LEGO® playsets. This full-color hardcover activity book will entertain LEGO® fans ages 6 to 8 as they pour over the highly detailed scenes! With its focus on the iconic toy's history, this book will make a great gift for LEGO® fans and collectors of all ages.

The wisecracking ninjas are back with all-new adventures! An exciting activity book based on the latest season of the hit LEGO Ninjago TV show! This fun-filled book will include games, puzzles, stories, and a buildable Minifigure.

This conference proceeding LNCS 12203 constitutes the refereed proceedings of the 12th International Conference on Cross-Cultural Design, CCD 2020, held as part of HCI International 2020 in Copenhagen, Denmark in July 2020. The conference was held virtually due to the corona pandemic. The total of 1439 papers and 238 posters included in the 40 HCII 2020 proceedings volumes was carefully reviewed and selected from 6326 submissions. The regular papers of DAPI 2020, Distributed, Ambient and Pervasive Interactions, presented in this volume were organized in topical sections named: Design Approaches, Methods and Tools, Smart Cities and Landscapes, Well-being, Learning and Culture in Intelligent Environments and much more.

Features popular ocean creatures and their habitat including: sharks; whales; otters; and starfish. Parents love this series because it helps kids to get unplugged and expand creativity. They also love it because it helps them get outside the “model set” mentality (which saves money and expands STEM thinking abilities.)
