Trans-Siberian railway is completed. Construction of the Panama Canal begins. Roger Casement publishes his account of Belgian atrocities in the Congo Free State.

Timeline of the 20th century - Wikipedia
Year 348 was a leap year starting on Friday of the Julian calendar. At the time, it was known as the Year of the Consulship of Philippus and Salia. The denomination 348 for this year has been used since the early medieval period, when the Anno Domini calendar era became the prevalent method in Europe for naming years.

348 - Wikipedia
The Cambridge History of Twentieth-Century Music, first published in 2004, is an appraisal of the development of music in the twentieth century from the vantage-point of the twenty-first. This wide-ranging and eclectic book traces the progressive fragmentation of the European 'art' tradition, and its relocation as one tradition among many at the century's end.

This widely acclaimed introduction to modern Christian thought, formerly published by Prentice Hall, provides full, scholarly accounts of the major movements and thinkers, theologians and philosophers in the Christian tradition since the eighteenth-century Enlightenment, together with solid historical background and critical assessments. This second edition deals with the entire modern period, in both Europe and America, and is the first to include extensive treatment of modern Catholic thinkers, Evangelical thought, and Black and Womanist theology.

Matériel culture encompasses the material remains of conflict, from buildings and monuments to artefacts and militia, as well as human remains. This collection of essays, from an international range of contributors, illustrates the diversity in this material record, highlights the difficulties and challenges in preserving, presenting and interpreting it, and above all demonstrates the significant role matériel culture can play in contemporary society. Among the many studies are:
* the 'culture of shells'
* the archaeology of nuclear testing grounds
* Cambodia's 'killing fields'
* the Berlin Wall
* and the biography of a medal
*the reappearance of Argentina's 'disappeared'
*World War II concentration camps.

This broad-ranging "Companion" gives readers a thorough grounding in both the background and the substance of eighteenth-century poetry in all its rich variety. An up-to-date and wide-ranging guide to eighteenth-century poetry. Reflects the dramatic transformation which has taken place in the study of eighteenth-century poetry over the past two decades. Opens with a section on contexts, discussing poetry's relationships with patriotism, politics, science, and the visual arts, for example. Discusses poetry by male and female poets from all walks of life. Includes numerous close readings of individual poems, ranging from Pope's "The Rape of the Lock" to Mary Collier's "The Woman's Labour." Includes more provocative contributions on subjects such as rural poetry and the self-taught tradition, British poetry 'beyond the borders', the constructions of femininity, women as writers and women as readers. Designed to be used alongside David Fairer and Christine Gerrard's "Eighteenth-century Poetry: An Annotated Anthology" (Blackwell Publishing, Second Edition, 2003).

The definitive guide to understanding Taoism—no matter your background or faith
Lao Tzu's Tao Te Ching is the second most translated book in the world, and the practice of religious Taoism is on the rise in China, where adherents currently number in the hundreds of millions. Yet there remains a remarkable lack of reliable information about Taoism for curious westerners. Taoism For Dummies provides comprehensive coverage of Taoism's origins in China's Chou Dynasty, its underlying quietist principles, its emergence as a major religion, various interpretation of its core texts, including both Eastern and Western interpretations, key Taoist concepts, and much more. It also provides a fascinating glimpse of Taoism in contemporary China. The ideal guide for readers interested in this influential religion, as well as those taking an introductory course on Taoism or Chinese Religion
A valuable source of insight for those with an interest in modern Chinese culture and beliefs

When originally published in 1994 this volume was the first international review of accounting theory to focus on the contributions of its leading thinkers. Very few attempts had been made, in the accounting literature, to assess the contribution of the theorists who have had such an important influence on the direction of research and practice. Written by experts the studies in this volume provide a unique guide to the development of accounting theory and practice in regions as diverse as the USA, Japan and Europe.

The eleventh volume in this ground-breaking series pays special attention to politically engaged poetry, written during a turbulent period which saw the Constitutional Revolution in Iran as well as the rise to power of Reza Shah and his attempts to implement reform. Throughout this time, poets began to turn their attention towards the country's ordinary people, rather than concentrate on its elites. This volume also examines the prose fiction of the period, which saw the rise of the novel and short story. Additionally, Persian satire began to grow in importance, especially with the increased popularity of poets and novelists such as Iraj Mirza and Sadeq Hedayat. This wide-ranging volume is an invaluable companion for anyone who wants to understand how the Persian literary scene changed at the beginning of the twentieth century, reflecting the social and political contexts in which this literature was created

Originally published in 1986. This book is a unique compilation of biographical sketches which covers editors, publishers, photographers, bureau chiefs, columnists, commentators, cartoonists, and artists. Alphabetical entries provide overviews of the lives and personalities of a good cross-section of important people. There is also a short essay on awards and prize winners. Everything is efficiently indexed. This is a supremely useful reference tool for those in mass media and popular culture fields.

Looks at the central ideas in adult education and the impact of the major thinkers in this field. Examines the work of 17 individual thinkers in detail and includes a chapter on significant feminist thinkers in adult education.

Lynn Garafola has written some of the most influential historical studies & criticism in the field of dance. This volume offers a selection of her essays & reviews that together document the extraordinary transformation of dance, especially ballet, sincethe early 20th century.

A glorious period of Hungarian mathematics started in 1900 when Lipót Fejér discovered the summability of Fourier series.This was followed by the discoveries of his disciples in Fourier analysis and in the theory of analytic functions. At the same time Frederic (Frigyes) Riesz created functional analysis and Alfred Haar gave the first example of wavelets. Later the topics investigated by Hungarian mathematicians broadened

considerably, and included topology, operator theory, differential equations, probability, etc. The present volume, the first of two, presents some of the most remarkable results achieved in the twentieth century by Hungarians in analysis, geometry and stochastics. The book is accessible to anyone with a minimum knowledge of mathematics. It is supplemented with an essay on the history of Hungary in the twentieth century and biographies of those mathematicians who are no longer active. A list of all persons referred to in the chapters concludes the volume.
