Calculating EI premiums. Each year, we give the maximum insurable earnings and rate for you to calculate the amount of EI to deduct from your employees. You have to deduct EI premiums from insurable earnings you pay to your employees. In addition, you must pay 1.4 times the amount of the employee's premiums. You may qualify for a reduction of the employer contribution if you give your employees a short-term disability plan.

As of 2017, the EI rate is 1.63 percent. To calculate how much to withhold from your employee's paycheque, multiply their payment by 0.0163. For example, if your employee's pay is \$1,000, his EI premium is \$16.30. You also have to remit a payment to the Canada Revenue Agency on behalf of your employee.

I know with EI the ratio of nitrate to phosphate is approx. 10:1, however after a few weeks it stabilises at 2:1. Could that be the imbalance referred? Another quick question, my tap water has 3 ppm phosphate in it, I'm led to believe that's the range I'm aiming for when dosing.

~~EI15 4th Edition, Improvements and Application~~

~~Vessels Third Edition~~
EI = $(\$400 \times 1.52\%$ or $\$400 \times .0152 = \$6.08) + (\$6.08 \times 1.4 =$
 $\$8.51)$ EI = $\$6.08 + \$8.51 = \$14.59$. \$6.08 is the employee's
weekly EI contribution which you withhold from his gross
salary. Therefore, his net salary after you deduct his EI
contribution would be \$393.00 per week.
