People are accustomed to seeing cardboard displays, menu board additions, tray liners and other promotional items meant to let hungry people know about the latest offerings. But, technology has substantially increased the options available to restaurant brands. For example, TV screens built into mirrors made from smart glass combine advertising with luxury.

[Emerging Technologies Taking Over the Food and Drink ...](#)

We've invented an ultrasound-based drying technology that uses sound waves, low temperatures and reduced drying times to dry food products far more gently with less energy. It's still at the research stage and not yet used commercially, but the results are showing promise for better product quality such as retention of antioxidants, vitamin C and other nutritional components.
