Carbon dioxide is already at its highest levels in 3.6 million years. Now, a new study found the Amazon is losing its ability to balance out the atmosphere.

Part of the Amazon is emitting more carbon dioxide than it absorbs — and it's a "really big warning" for the planet

Carbon dioxide is already at its highest levels in 3.6 million years. Now, a new study found the Amazon is losing its ability to balance out the atmosphere.

Humans are threatening the Amazon's ability to absorb CO2, study warns

A new study analyzing hundreds of aerial readings of emissions above the forest canopy found that forest regions in the southeast were most affected.

Parts of the Amazon Go From Absorbing Carbon Dioxide to Emitting It

European researchers have concluded that regulations and policies currently being debated which are designed to reduce the environmental impact of aviation could significantly lower the sector's ...

EU-backed study quantifies CO2 cuts from planned policies for green aviation

A new study shows portions of the Amazon rainforest are now emitting more carbon dioxide than they absorb due to factors including deforestation and climate change.

Study: Parts of Amazon rainforest now emit more CO2 than what is absorbed

Researchers have found that the Amazon rainforest emits more carbon dioxide than it absorbs, further accelerating climate change.

Amazon rainforest now producing more carbon dioxide than it absorbs

Climate change and deforestation have flipped a large swathe of the Amazon basin from absorbing to emitting planet-warming CO2, a transformation that could turn humanity's greatest natural ally in the ...
