ISO 15614-13:2012 defines the conditions for carrying out tests and the limits of validity of a qualified welding procedure for all the practical welding operations that it covers. The tests required to qualify the procedure for a particular component or assembly depend on the performance and quality requirements of the component or assembly, as defined in the design specification.

ISO 15614-1:2017 applies to production welding, repair welding and build-up welding. ISO 15614-1:2017 defines the conditions for the execution of welding procedure tests and the range of qualification for welding procedures for all practical welding operations within the qualification of this document.

ISO - ISO 15614-1:2017 - Specification and qualification ...

What is this standard about? BS EN ISO 15614 provides preliminary welding procedure tests designed to ensure that a given weld will perform as required. This part covers arc and gas welding of steels and arc welding of nickel and nickel alloys. It defines how the welding procedure test should be conducted and the range of acceptable results.
