Engineering drawing and computer graphics - Course

An engineering drawing is a type of technical drawing that is used to convey information about an object. A common use is to specify the geometry necessary for the construction of a component and is called a detail drawing. Usually, a number of drawings are necessary to completely specify even a simple component. The drawings are linked together by a master drawing or assembly drawing which gives the drawing numbers of the subsequent detailed components, quantities required, construction materia

Engineering drawing - Wikipedia

Engineering drawing is the most useful for engineering student to design any structure machine in a real-life first of all all engineers study about how to build any construction or any machinery item .he would make a drawing of those items in a drawing it could be on paper drawing or computer drawing by the use of CAD CIM or any designing software and calculate all the possibilities of ...
