The Economics and Management degree examines issues central to the world we live in: namely how the economy and organisations function, and how resources are allocated and coordinated to achieve the organisation's objectives.

Designed as a textbook for undergraduate students in various engineering disciplines"Mechanical, Civil, Industrial Engineering, Electronics Engineer-ing and Computer Science"and for postgraduate students in Industrial Engineering and Water Resource Management, this comprehensive and well-organized book, now in its Second Edition, shows how complex economic decisions can be made from a number of given alternatives. It provides the managers not only a sound basis but also a clear-cut approach to making decisions. These decisions will ultimately result in minimizing costs and/or maximizing benefits. What is more, the book adequately illustrates the concepts with numerical problems and Indian cases. While retaining all the chapters of the previous edition, the book adds a number of topics to make it more comprehensive and more student friendly. What's New to This Edition " Discusses different types of costs such as average cost, recurring cost, and life cycle cost. " Deals with different types of cost estimating models, index numbers and capital allowance. " Covers the basics of nondeterministic decision making. " Describes the meaning of cash flows with probability distributions and decision making, and selection of alternatives using simulation. " Discusses the basic concepts of Accounting. This book, which is profusely illustrated with worked-out examples and a number of diagrams and tables, should prove extremely useful not only as a text but also as a reference for those offering courses in such areas as Project Management, Production Management, and Financial Management.

This book presents the outcomes of the annual "Engineering Economics Week " 2020," organized by the Russian Union of Industrialists and Entrepreneurs, the Institute of Management and the Institute of Market Problems of the Russian Academy of Sciences (RAS), the South-Russian State Polytechnic University and Samara State University of Economics, and held in online format in May 2020.
