" —Daniel G. Amen, M.D., founder, Amen Clinics, Inc., and bestselling author of Change Your Brain, Change Your Life " The Mediterranean Zone is very readable for the layman, but it also contains some significant new science, particularly in the appendix, for those who really want to learn about the biochemistry of omega-3 fatty acids, polyphenols, and epigenetics. Dr. Sears has clarified many aspects for me regarding the resolution of inflammation. His discussion of eicosanoids and gene transcription factors remains the best I have read. Finally, the dietary circle of anti-inflammatory nutrition is completed by his superb discussion of the value of polyphenols in any diet, and in particular an anti-inflammatory diet. I remain extremely admiring of his ability to take such complicated science and put it in an understandable and useful form. " —Joseph C. Combat silent inflammation -- the most serious health threat you never heard of Heart disease is the #1 killer of Americans. Cancer is the #1 fear of Americans. Dementia is the #1 concern of Americans. What do these devastating illnesses have in common? All three have been linked to silent inflammation, a condition that occurs when the body's natural immune response goes awry. Silent inflammation can continue undetected for years, continually assaulting the heart, arteries, and even the brain -- and you will not even know it. New research confirms that obesity is a primary cause of silent inflammation. And inflammation is the smoking gun that links excess body fat to today's epidemic rise in heart disease, cancer, dementia, and countless other health threats. Although the science of this relationship is complex, the bottom line is simple: If not detected and reversed, silent inflammation will devastate generations of Americans and bankrupt an increasingly stressed health care system. The medical establishment appears to be ignorant about this problem, politicians don't talk about it -- and yet virtually everyone in the country is affected by it. In his number one New York Times bestseller The Zone, Dr. Barry Sears revolutionized the way we think about nutrition when he showed that a high-carbohydrate diet is a real risk to our health. Now, with eye-opening new research in the field of hormonal control and nutrition, Dr. Sears offers the first comprehensive plan to combat silent inflammation. This important book gives us the tools and tests we need to assess the current level of silent inflammation in our bodies -- and determine our future health.
