Carlos is a lover of women. He loves them passionately, intensely, and deeply, and he tries to be sincere and tender. He is sensual and caring, generous in his affection and attention, and prone to fall ardently in love. His sensual adventures, filled with the pursuit of beauty and every possible hedonistic pleasure, take him to three different countries. In each country, he loses his heart on the perpetual quest for the elusive love of his life. He knows that each woman he romances is ready to be loved, and itis up to him to unlock the mystery of her inner heart if he desires access to more. But on his lust-fueled quest, he finds an unexpected surprise in an older woman. Has he finally found the one woman he could love forever in this sophisticated and beautiful woman he meets? Is she the woman of his dreams, his fantasies, his heart's desire? Only time will tell. The heart wants what the heart wants, and Carlos knows just how far he will go to see his most fervent dreams come true.

Do you want your students to just take psychology or to experience psychology? Experience Psychology is a complete learning system that empowers students to personally, critically, and actively experience the impact of psychology in everyday life. Experience Psychology is about, well, experience--our own behaviors; our relationships at home and in our communities, in school and at work; and our interactions in different learning environments. Grounded in meaningful real-world contexts, Experience Psychology's contemporary examples, personalized author notes, and applied exercises speak directly to students, allowing them to engage with psychology and to learn verbally, visually, and experientially--by reading, seeing, and doing. With the Experience Psychology learning system, students do not just "take" psychology but actively experience it. Experience a Personalized Approach How many students think they know everything about introductory psychology but struggle on the first exam? LearnSmart, McGraw-Hill's adaptive learning system, pinpoints students' metacognitive abilities and limitations, identifying what they know--and more importantly, what they don't know. Using Bloom's Taxonomy and a highly sophisticated "smart" algorithm, LearnSmart creates a personalized, customized study plan that's unique to each individual student's demonstrated needs. With virtually no administrative overhead, instructors using LearnSmart are reporting an increase in student performance by a letter-grade or more. Throughout Experience Psychology, students find a wealth of personal pedagogical "asides" directly from Laura King to guide their understanding and stimulate their interest as they read. Some of these helpful notes highlight crucial terms and concepts; others prompt students to think critically about the complexities of the issues; other notes encourage students to apply what they have learned to their prior reading or to a new situation. These mini-conversations between author and students help develop analytical skills for students to carry and apply well beyond their course. Experience an Emphasis on Critical Thinking Experience Psychology stimulates critical reflection and analysis. Challenge Your Thinking sidebar features involve students in debates relevant to findings from contemporary psychological research. Thought-provoking questions encourage examination of the evidence on both sides of a debate or issue. Also oriented toward critical thought are the text's Intersection selections. Showcasing studies in different areas of psychological research that are being conducted on the same topic, the Intersections shed light on the links between, and the reciprocal influences of, this exciting work, and they raise provocative questions for student reflection and class discussion. The new Psychological Inquiry feature encourages and guides analysis and interpretation of figures and photos by embedding a range critical thinking questions in selective captions. To help students master challenging concepts, Experience Psychology also includes a special section, "Touring the Brain and Nervous System," featuring detailed, full-color transparency overlays of important figures. Conceived and developed with the input of an expert in each specific area, the overlays offer hands-on practice in grasping key biological structures and processes that are essential to success in the course. A feature called Apply It to Our World links the subject matter of the transparency overlays to common real-life situations such as the fear of spiders. On-page assessment questions and answers, as well as critical thinking questions, accompany each figure. Experience an Emphasis on Active Engagement With the new Experience It! feature, students can use their mobile devices to practice and master key concepts wherever and whenever they choose. By snapping easily located QR codes, students gain access to videos, Concept Clips, and related news articles, for a highly portable, rich, and immersive experience that powerfully reinforces the chapter reading. Through Do It!, a series of brief, reoccurring sidebar activities linked to the text reading, students get an opportunity to test their assumptions and learn through hands-on exploration and discovery. Reinforcing that the science of psychology requires active participation, Do It! selections include, for example, an exercise on conducting an informal survey to observe and classify behaviors in a public setting, as well as an activity guiding students on how to research a "happiness gene." Such exercises provide students with a vibrant and involving experience that gets them thinking as psychologists do. Experience Psychology helps students to perform to their maximum potential in and out of the classroom, fully engaging them in the content and experiences that comprise the world's most popular undergraduate major.

ILION Industrial Services is pleased to announce this brand new renovation manual which is written specifically for the Bridgeport 2J variable speed mills. If you are planning on refurbishing your Bridgeport Series 1 "2J" or "2J2" Mill or if you are out in the market looking for a good used Bridgeport, then this manual is a great place to start. " A Guide to Renovating the Bridgeport 2J Variable Speed Milling Machine " ; our 152 page soft-cover shop manual, is fully illustrated with over 400 B&W photographs and diagrams, plus step-by-step instructions for disassembling, cleaning, reassembling and adjusting all of the critical components of the variable speed 2J milling machine. The manual also illustrates the difference in the various models and provides guidance for evaluating a used machine before you purchase. Bridgeport never produced a full blown maintenance manual for their mills so this is the closest you will come to a step-by-step guide. The typeface of the manual is printed two points larger than normal for those of us who prefer to work at the bench without the use of our reading glasses. The instructions are simple and easy to follow... no prior machinery renovation experience is required. Though the Bridgeport is an industrial machine, it is well suited for the home garage shop or small business and the task of loacting one, getting it home and placing it back in service is not as expensive or challenging as you may think. Let us show you how. If you are interested in the original Bridgeport J Head (the Step-Pulley model), please check out our other books.
