may suggest we are in for yet another esoteric theory on how Egyptian civilisation was introduced by a master race of Atlantean Freemasons. In fact believers in that sort of thing are likely to be a tad disappointed because what we get is very elegantly written and convincing theory that, in extreme synthesis, the origins of Ancient Egyptian Civilisation were more or less, in Egypt.

Genesis of the Pharaohs is Toby Wilkinson's investigation into the origins of Ancient Egyptian civilisation, focusing on rock art found on the desert bordering onto modern day Egypt which was once, in prehistoric times, savannah. His theories solely reject the notion of an invasion from other lands, instead discussing how the Ancient Egyptian civilisation grew from the semi-nomadic peoples in the savannah to the east and west of the Nile as well as within the Nile Valley itself.
