Genetics and human behaviour: the ethical context. Research is exploring how genes and the environment influence behavioural traits such as aggression, anxiety, intelligence and sexual orientation. This report addresses concerns over how this information could be used to try to predict, change or select such traits.

Genetics and - Nuffield Council on Bioethics
The Nuffield Council on Bioethics has published a Report,
Genetics and human behaviour: the ethical context, which
examines the ethical, legal and social issues that behavioural
genetics raises. This summary sets out some of the
arguments and recommendations which are discussed in
more detail in the Report.

Genetics and human behaviour: the ethical context
Genetics and Human Behaviour: the ethical context. 1 To
define and consider ethical, social and legal issues arising
from the study of the genetics of variation within the normal
range of behavioural characteristics. 1. 2 To survey the
current field of research, in particular, to review:

Genetics and Human Behaviour: the ethical context
Genetics And Human Behaviour Nuffield Genetics and
human behaviour: the ethical context. Research is exploring
how genes and the environment influence behavioural traits
such as aggression, anxiety, intelligence and sexual
orientation. This report

Genetics And Human Behaviour Nuffield Bioethics
How genetic influence on human behaviour changes in time
and place. Research shows how genes affect educational
attainment and fertility in different times and places. A new
study led by Professor Melinda Mills shows that genes linked

Human Genetics Alert response to Nuffield Council consultation on behavioural genetics Introduction. Human Genetics Alert is an independent watchdog group focusing on social and ethical issues raised by human genetics and reproductive technologies. Question 4.1: What you think are the likely advantages and disadvantages of research in behavioural genetics? We see few advantages, and few are mentioned in the consultation paper itself.

aims of current behavior genetics is to use genetic methodology to learn more about the behavior. We don't simply want to know the heritability of a behavior. That has as much use as stamp-collecting. We want to use the methods of behavior genetics to provide unique insights into the behavior. You would not guess this from the four chapters

Who should fund and control the direction of human ...

In this (Nuffield Council on Bioethics 2002), the third in its series on ethics and related issues in genetics (see also Nuffield Council on Bioethics 1993 and Nuffield Council on Bioethics 1998), the Nuffield Council has focused on four 'normal' behaviors; intelligence, personality, antisocial behavior and sexual orientation. This is a narrow range of behaviors and one where their discussion of the potential impact of predictive genetic testing is probably inappropriate.
