Century Middle | IB Middle Years Programme School

The Punnett square is a diagram that is used to predict an outcome of a particular cross or breeding experiment. It is named after Reginald C. Punnett, who devised the approach to determine the probability of an offspring's having a particular genotype (combination of alleles).

### Understanding Genetics: Punnett Squares

More Punnett Square Practice 1.2. A Punnett square helps scientists predict the possible genotypes and phenotypes of offspring when they know the genotypes of the parents. The phenotype is the physical appearance of an organism and the genotype is the inherited combination of alleles. This skill sheet will give you additional
