Video and audiobooth with Raspberry pi 3b – Ed's Playground

Because we want to stream both audio and video from the camera and USB microphone, we need to use a software project called Picam. Make sure to run all commands from the Pi user directory, i.e. your prompt should look like: pi@raspberrypi:~ \$ The ~ denotes your user's home directory. Run the following command in the terminal to install some Picam dependencies: sudo apt-get install

Ed's Playground – My Personal Playground

The next challenge is to combine the video file and the audio file. I have not tried this with the Raspi, but OpenShot will allow you to import the two files and move the audio backwards and forwards in time until in sync with the video. Don't forget, if you want to view mp4 files on the Raspi, you will need a licence.
