Post-World War II, the book describes GPO's transition from traditional printing to the digital technology of today. It also highlights the hugely significant role the agency has played in the dissemination of federal Government information through its publications sales and Federal depository library programs. This, the 30th edition of the "United States Government Printing Office Style Manual," is the first revision to this authoritative style manual since 2002. The "GPO Style Manual, as it is popularly known, is issued under the authority of section 1105 of Title 44 U.S.C., which requires the Public Printer, as head of the GPO to "determine the form and style in which the printing...ordered by a department is executed...having proper regard to economy, workmanship, and the purposes for which the work is needed." The Manual is prepared by the GPO Style Board, composed of proofreading, printing, and Government documents specialists from within GPO, where all congressional publications, and many other key Federal Government documents are prepared. The first "GPO Style Manual" appeared in 1894. It was developed originally as a printer's stylebook to standardize word and type treatment and remains so today. Through successive editions, however, the "GPO Style Manual" has come to be widely recognized by writers and editors both within and outside the Federal Government as one of the most useful resources in the editorial arsenal. This new, revised version of the "GPO Style Manual" has been thoroughly redesigned to make it more modern and easier to read, and the content has been updated generally throughout in keeping with current usage.

Disseminates official information from all three branches of the United States federal government.

100 GPO years takes a chronological approach to GPO history, beginning with a history of public printing in America prior to 1860 and describing events year by year from 1861 to 1961.
