By definition, graphic design uses visual forms and elements of design to convey thoughts and ideas. It is a type of problem-solving, which is something it has in common with architecture. Design, in general, is about communication. Good design should captivate you and make you curious enough to question it further.

perhaps more importantly, influences our interaction with and the identity of place and space.

Graphic Design and Architecture | Peter
Meijer Architect, PC

Graphic Design for Architects is a handbook of techniques, explanations and examples of graphic design most relevant to architects. The book covers a variety of scales of graphic design, everything from portfolio design and competition boards, to signage and building super-graphics - to address every phase of architectural production.

Architecture speaks of space, form, place, and function while integrated Architectural Graphic Design communicates a building's function, purpose, message, and narrative. Effective and appropriate Architectural Graphic Design supports the statement made by a building and strengthens its presence. The architectural graphics layered into the conversation derive from the built context, spatial context, cultural context, and historical context.
