Hitler's Atlantic Wall, the complex system of coastal fortifications that stretched from Norway to the Spanish border during the Second World War, was built to defend occupied Europe from Allied invasion. Many of its principal structures survive and can be visited today, and this book is an authoritative guide to them. The wall, which was constructed on a massive scale between 1942 and 1944 by German engineers, forced laborers and troops, consisted of strong points, artillery casemates, bunkers, troop shelters, minefields, anti-tank and anti-boat obstacles. It also included the concrete U-boat and E-boat pens in the key ports and, behind the Channel coast, the V-weapon

sites. This huge scheme of fortifications was one of the longest defensive lines in military history. This history and guide takes the reader—and visitor—through the entire story of the fortifications from the fall of France to the Allied breakthrough and the defeat of the German armies in Normandy. This narrative puts the extensive remains that can be seen today in a fascinating historical context. As a guide to some of the most impressive relics of the Second World War, this book will be essential reading and reference for any one who is interested in the history of fortifications, D-Day and the liberation of occupied Europe.

Police: A Field Guide is an illustrated handbook to the methods, mythologies, and history that animate today ' s police. It is a survival manual for encounters with cops and police logic, whether it arrives in the shape of officer friendly, Tasers, curfews, non-compliance, or reformist discourses about so-called bad apples. In a series of short chapters, each focusing on a single term, such as the beat, order, badge, throw-down weapon, and much more, authors David Correia and Tyler Wall present a guide that reinvents and demystifies the language of policing in order to better prepare activists—and anyone with an open mind—on one of the key issues of our time: police brutality. In doing so, they begin to chart a future free of this violence—and of police.

there." We've all asked ourselves the question. It's impossible to look up at the stars and NOT think about it: Are we alone in the universe? Books, movies and television shows proliferate that attempt to answer this question and explore it. In *OUT THERE* Space.com senior writer Dr. Michael Wall treats that question as merely the beginning, touching off a wild ride of exploration into the final frontier. He considers, for instance, the myriad of questions that would arise once we do discover life beyond Earth (an eventuality which, top NASA officials told Wall, is only drawing closer). What would the first aliens we meet look like? Would they be little green men or mere microbes? Would they be found on a planet in our own solar system or orbiting a star far, far away? Would they intend to harm us, and if so, how might they do it? And might they already have visited? *OUT THERE* is arranged in a simple question-and-answer format. The answers are

Dr. Wall covers questions far beyond alien life, venturing into astronomy, physics, and the practical realities of what long-term life might be like for we mere humans in outer space, such as the idea of lunar colonies, and even economic implications. Dr. Wall also shares the insights of some of the leading lights in space exploration today, and shows how the next space age might be brighter than ever.
