In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also

contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

Critical English for Academic Purposes: Theory, Politics, and Practice is the first book to combine the theory and practice of two fields: English for academic purposes and critical pedagogy. English for academic purposes (EAP) grounds English language teaching in the cognitive and linguistic demands of academic situations, tailoring instruction to specific rather than general purposes. Critical pedagogy acknowledges students' and teachers' subject-positions, that is, their class, race, gender, and ethnicity, and encourages them to question the status quo. Critical English for academic purposes engages students in the types of activities they are asked to carry out in academic classes while inviting them to question and, in some cases, transform those activities, as well as the conditions from which they

arose. It takes into account the real challenges non-native speakers of English face in their discipline-specific classes while viewing students as active participants who can help shape academic goals and assignments. Critical English for Academic Purposes: Theory, Politics, and Practice: * relates English for academic purposes and critical pedagogy, revealing and problematizing the assumptions of both fields, * provides theoretical and practical responses to academic syllabi and other institutional demands to show that teachers can both meet target demands and take students' subjectivities into account in a climate of negotiation and possibility, * offers "rights analysis" as a critical counterpart to needs analysis, * discusses the politics of "coverage" in lecture classes and proposes alternatives, and * features

teaching examples that address balancing the curriculum for gender; building community in an EAP class of students from diverse economic and social backgrounds; students' rights; and organizing students to change unfavorable conditions. This book is intended for undergraduate and graduate courses for preservice and in-service ESL and EAP teachers. It is also a professional book for those interested in critical approaches to teaching and EAP.

Published by OpenStax College, U.S. History covers the breadth of the chronological history of the United States and also provides the necessary depth to ensure the course is

manageable for instructors and students alike. U.S. History is designed to meet the scope and sequence requirements of most courses. The authors introduce key forces and major developments that together form the American experience, with particular attention paid to considering issues of race, class and gender. The text provides a balanced approach to U.S. history, considering the people, events and ideas that have shaped the United States from both the top down (politics, economics, diplomacy) and bottom up (eyewitness accounts, lived experience).

This book draws together the most authoritative articles on

development economics published in the past few years, is aimed at undergraduate level and is suitable for students with little or no background in economics. The main themes include poverty, foreign aid, agriculture and human capital and amongst those whose work appears cannot be counted Amartya Sen, Jeffrey Sachs, Jagdish Bhagwati, Joseph Stiglitz, Paul Romer, Dani Rodrik, William Easterly, Robert Barro, Kenneth Arrow, Hernando de Soto, Daron Acemoglu, Muhammad Yunus, Anne Krueger, Abhijit Banerjee, Esther Duflo, Michael Kremer and Martin Feldstein. The reader focuses on the most recent and up-to-date contributions to the field of development economics. Instead of collecting "classic" contributions which are already available through many sources the articles chosen reflect recent

developments in the discipline (for instance, in the area of geography and development) and include contributions that address recent events (the dramatic resurgence of a debt relief movement). "The Development Economics Reader" should be an invaluable resource for all students of the discipline.

This Squid Ink Classic includes the full text of the work plus MLA style citations for scholarly secondary sources, peer-reviewed journal articles and critical essays for when your teacher requires extra resources in MLA format for your research paper.

People around the world are confused and concerned. Is it a

sign of strength or of weakness that the US has suddenly shifted from a politics of consensus to one of coercion on the world stage? What was really at stake in the war on Iraq? Was it all about oil and, if not, what else was involved? What role has a sagging economy played in pushing the US into foreign adventurism and what difference does it make that neo-conservatives rather than neo-liberals are now in power? What exactly is the relationship between US militarism abroad and domestic politics? These are the questions taken up in this compelling and original book. Closely argued but clearly written, 'The New Imperialism' builds a conceptual framework to expose the underlying forces at work behind these momentous shifts in US policies and politics. The compulsions behind the projection of US power on the world

At the end of the nineteenth century the United States swiftly occupied a string of small islands dotting the Caribbean and Western Pacific, from Puerto Rico and Cuba to Hawaii and the Philippines. *Colonial Crucible: Empire in the Making of the Modern American State* reveals how this experiment in direct territorial rule subtly but profoundly shaped U.S. policy and practice—both abroad and, crucially, at home. Edited by Alfred W. McCoy and Francisco A. Scarano, the essays in this volume show how the challenge of ruling such

far-flung territories strained the U.S. state to its limits, creating both the need and the opportunity for bold social experiments not yet possible within the United States itself. Plunging Washington ' s rudimentary bureaucracy into the white heat of nationalist revolution and imperial rivalry, colonialism was a crucible of change in American statecraft. From an expansion of the federal government to the creation of agile public-private networks for more effective global governance, U.S. empire produced far-reaching innovations. Moving well beyond theory, this volume takes the next step, adding a fine-grained, empirical texture to the study of U.S. imperialism by analyzing its specific consequences. Across a broad range of institutions—policing and prisons, education, race relations, public health, law, the military, and

environmental management—this formative experience left a lasting institutional imprint. With each essay distilling years, sometimes decades, of scholarship into a concise argument, Colonial Crucible reveals the roots of a legacy evident, most recently, in Washington ' s misadventures in the Middle East.
