(Bass Instruction). Do you play the bass guitar, but find parts of the fretboard to be uncharted territory? This book will teach you how to conquer your fretboard's rough terrain, and no music reading is required! Basic music theory helps improve your playing and ability to interact with other musicians. Take your playing to new levels with this systematic, comprehensive method! This book takes a step-by-step approach to teach you to read and play every note on the guitar fretboard. You start by reading and playing studies in 2nd position, and gradually work your way up, position by position, to 12th position (employing all major and minor keys as you go). Whereas many exercise books' studies are rather dull or repetitious, this book exclusively employs, as studies, charming tunes originally composed as songs by blind Celtic harper and master melodist Turlough O'Carolan (1670-1738). An Appendix includes a discussion of such topics as notes outside the key, notes outside the position, and position shifts.

This in-depth scale and arpeggio text is core curriculum at the University of Southern California's Studio Guitar department, which is part of the prestigious Flora L. Thornton School of Music, located in Los Angeles, California. Using a comprehensive approach that includes three different organizational systems, it covers the technical foundation that is necessary for playing any style of music. The CAGED system (five positions), the Finger Stretch system (all twelve keys in one position) and the Three-Note Per String system (seven patterns) are examined. Although each of these three systems is examined, the CAGED system serves as the basis for much of the material covered in this book. Instead of traditional musical notation, the book uses fingerboard diagrams to focus on the visual aspect of the patterns. The goal is to present an approach to understanding and mastering the fingerboard by outlining the best and most practical elements of these different systems. Book One presents patterns for the major scale and its relative modes, the major pentatonic scale, the minor pentatonic scale, and the blues scale. Along with these scale forms, patterns for arpeggios that are for the most part diatonic to (in the key of) the major scale are presented. These include major, minor, diminished and augmented triads, and also major 7, dominant 7, minor 7, minor 7(5), and diminished 7 chords.
