Head First Servlets and JSP: Passing the Sun-Certified Web  
Servlet and JSP Tutorial: Web & HTTP. Web is a system of Internet servers that supports formatted documents. The documents are formatted using a markup language called HTML (HyperText Markup Language) that supports links to other documents like graphics, audio, and video files etc. Now that we know what is web, let's move further and understand what is a website.

Servlet and JSP Tutorial | How to Build Web Applications  
Head first Servlet and JSP (O'Reilly Publication) This book covers a lot about JSP and servlet. It is an interactive and far better than those plain black-white old java reference books. It also covers JSTL part. A book which feels like light weight comic but actually clears all concepts. Reader level: Beginner to Intermediate.

Which is a good refrence book for Servlets and JSP? - Quora  
Your JSP eventually becomes a full-fledged servlet running in your web app. It's a lot like any other servlet, except that the servlet class is written for you—by the Container. The Container takes what you've written in your JSP, translates it into a servlet class source (.java) file, then compiles that into a Java servlet class. After that, it's just servlets all the way down, and the servlet runs in exactly the same way it would if you'd written and compiled the code yourself.

In the end, a JSP is just a servlet - Head First Servlets  
Head First Servlets and JSP's brain-friendly approach drives the knowledge straight into your head (without sharp instruments). You'll interact with servlets and JSPs in ways that help you learn quickly and deeply. It may not be The Da Vinci Code, but quickly see why so many reviewers call it "a page turner".
