Adjust the shoulder straps until they are level with or just below the top of your baby's shoulders. The shoulder harnesses are fed through whichever of the three loop positions that best fits your baby. When you place your baby in the seat, secure the waist straps around his waist and the shoulder straps over his shoulders. Pull the crotch strap up between his legs and connect everything by placing the male end of each strap into the crotch strap's buckle.

Expanded coverage of new baby gear items, like extra-large playpens, sleep soothers and more

" If you want to understand why Americans are protesting in the streets right now, read this book. OK Boomer, Let ' s Talk blows the lid off the conversations about inequality and racism that lie at the heart of our national divide. " —Jose Antonio Vargas, founder of Define American and author of Dear America: Notes of an Undocumented Citizen " Jill Filipovic cuts through the noise with characteristic clarity and nuance. Behind the meme is a thoughtfully reported book that greatly contributes to our understanding of generational change. " —Irin Carmon, coauthor of the New York Times bestseller Notorious RBG Baby Boomers are the most prosperous generation in American history, but their kids are screwed. In this eye-opening book, journalist Jill Filipovic breaks down the massive problems facing Millennials including climate, money, housing, and healthcare. In Ok Boomer, Let ' s Talk, journalist (and Millennial) Jill Filipovic tells the definitive story of her generation—and it ' s no joke. Talking to gig workers, economists, policy makers, and dozens of struggling Millennials drowning in debt on a planet quite literally in flames, Filipovic paints a shocking and nuanced portrait of a generation being left behind: -Millennials are the most educated generation in American history—and also the most broke. -Millennials hold just 3 percent of American wealth. When they were the same age, Boomers held 21 percent. -The average older Millennial has \$15,000 in student loan debt. The average Boomer at the same age? Just \$2,300 in today ' s dollars. -Millennials are paying almost 40 percent more for their first homes than Boomers did. -American families spend twice as much on healthcare now than they did when Boomers were young parents. Filipovic shows that Millennials are not the avocado-toast-eating snowflakes of Boomer outrage fantasies. But they are the first American generation that will do worse than their parents. " OK, Boomer " isn ' t just a sarcastic dismissal—it ' s a recognition that Millennials are in crisis, and that Boomer voters, bankers, and policy makers are responsible. Filipovic goes beyond the meme, unpending dated assumptions with revelatory data and revealing portraits of young people delaying adulthood to pay down debt, obsessed with " wellness " because they can ' t afford real healthcare, and struggling to #hustle in the precarious gig economy. Ok Boomer, Let ' s Talk is at once an explainer and an extended olive branch that will finally allow these two generations to truly understand each other.

In the annals of consumer crazes, nothing compares to Beanie Babies. With no advertising or big-box distribution, creator Ty Warner - an eccentric college dropout - become a billionaire in just three years. And it was all thanks to collectors. The end of the craze was just as swift and extremely devastating, with "rare" Beanie Babies deemed worthless as quickly as they'd once been deemed priceless. Bissonnette draws on hundreds of interviews (including a visit to a man who lives with his 40,000 Ty products and an in-prison interview with a guy who killed a coworker over a Beanie Baby debt) for the first book on the most extraordinary craze of the 1990s.

Dr. Seuss creates another timeless picture-book classic with The Sneetches and Other Stories. Are you a Star-Belly Sneetch or a Plain-Belly Sneetch? This delightful book contains four tales with deliciously subtle takes on how silly it is to be, well, silly. " The Sneetches, " " The Zax, " " Too Many Daves, " and " What Was I Scared Of? " make this energetic compilation a must-have for every library. Full of Dr. Seuss ' s signature rhymes and unmistakable characters, it ' s perfect for new and lifelong Seuss fans. This Read & Listen edition contains audio narration.

Drug overdose, driven largely by overdose related to the use of opioids, is now the leading cause of unintentional injury death in the United States. The ongoing opioid crisis lies at the intersection of two public health challenges: reducing the burden of suffering from pain and containing the rising toll of the harms that can arise from the use of opioid medications. Chronic pain and opioid use disorder both represent complex human conditions affecting millions of Americans and causing untold disability and loss of function. In the context of the growing opioid problem, the U.S. Food and Drug Administration (FDA) launched an Opioids Action Plan in early 2016. As part of this plan, the FDA asked the National Academies of Sciences, Engineering, and Medicine to convene a committee to update the state of the science on pain research, care, and education and to identify actions the FDA and others can take to respond to the opioid epidemic, with a particular focus on informing FDA's development of a formal method for incorporating individual and societal considerations into its risk-benefit framework for opioid approval and monitoring.

INSTANT NEW YORK TIMES BESTSELLER A Science News favorite science book of 2019 As you read these words, copies of you are being created. Sean Carroll, theoretical physicist and one of this world ' s most celebrated writers on science, rewrites the history of 20th century physics. Already hailed as a masterpiece, Something Deeply Hidden shows for the first time that facing up to the essential puzzle of quantum mechanics utterly transforms how we think about space and time. His reconciling of quantum mechanics with Einstein ' s theory of relativity changes, well, everything. Most physicists haven ' t even recognized the uncomfortable truth: physics has been in crisis since 1927. Quantum mechanics has always had obvious gaps—which have come to be simply ignored. Science popularizers keep telling us how weird it is, how impossible it is to understand. Academics discourage students from working on the "dead end" of quantum foundations. Putting his professional reputation on the line with this audacious yet entirely reasonable book, Carroll says that the crisis can now come to an end. We just have to accept that there is more than one of us in the universe. There are many, many Sean Carrolls. Many of every one of us. Copies of you are generated thousands of times per second. The Many Worlds Theory of quantum behavior says that every time there is a quantum event, a world splits off with everything in it the same, except in that other world the quantum event didn't happen. Step-by-step in Carroll's uniquely lucid way, he tackles the major objections to this otherworldly revelation until his case is inescapably established. Rarely does a book so fully reorganize how we think about our place in the universe. We are on the threshold of a new understanding—of where we are in the cosmos, and what we are made of.

As seen in Time, USA TODAY, The Atlantic, The Wall Street Journal, and on CBS This Morning, BBC, PBS, CNN, and NPR, iGen is crucial reading to understand how the children, teens, and young adults born in the mid-1990s and later are vastly different from their Millennial predecessors, and from any other generation. With generational divides wider than ever, parents, educators, and employers have an urgent need to understand today ' s rising generation of teens and young adults. Born in the mid-1990s up to the mid-2000s, iGen is the first generation to spend their entire adolescence in the age of the smartphone. With social media and texting replacing other activities, iGen spends less time with their friends in person—perhaps contributing to their unprecedented levels of anxiety, depression, and loneliness. But technology is not the only thing that makes iGen distinct from every generation before them; they are also different in how they spend their time, how they behave, and in their attitudes toward religion, sexuality, and politics. They socialize in completely new ways, reject once sacred social taboos, and want different things from their lives and careers. More than previous generations, they are obsessed with safety, focused on tolerance, and have no patience for inequality. With the first members of iGen just graduating from college, we all need to understand them: friends and family need to look out for them; businesses must figure out how to recruit them and sell to them; colleges and universities must know how to educate and guide them. And members of iGen also need to understand themselves as they communicate with their elders and explain their views to their older peers. Because where iGen goes, so goes our nation—and the world.

\*NYTBR Paperback Row Selection\* An investigation into the damage wrought by the colossal clothing industry and the grassroots, high-tech, international movement fighting to reform it What should I wear? It's one of the fundamental questions we ask ourselves every day. More than ever, we are told it should be something new. Today, the clothing industry churns out 80 billion garments a year and employs every sixth person on Earth. Historically, the apparel trade has exploited labor, the environment, and intellectual property--and in the last three decades, with the simultaneous unfurling of fast fashion, globalization, and the tech revolution, those abuses have multiplied exponentially, primarily out of view. We are in dire need of an entirely new human-scale model. Bestselling journalist Dana Thomas has traveled the globe to discover the visionary designers and companies who are propelling the industry toward that more positive future by reclaiming traditional craft and launching cutting-edge sustainable technologies to produce better fashion. In Fashionopolis, Thomas sees renewal in a host of developments, including printing 3-D clothes, clean denim processing, smart manufacturing, hyperlocalism, fabric recycling--even lab-grown materials. From small-town makers and Silicon Valley whizzes to such household names as Stella McCartney, Levi's, and Rent the Runway, Thomas highlights the companies big and small that are leading the crusade. We all have been casual about our clothes. It's time to get dressed with intention. Fashionopolis is the first comprehensive look at how to start.

Filipino recipes from the the creator of the legendary Eggslut in LA, host of the hit online series The Burger Show, and the most prominent Filipino chef in the US. Alvin Cailan has risen to become arguably the most high-profile chef in America's Filipino food movement. He took the food scene by storm when he opened the now-legendary Eggslut in Los Angeles, a foodie cult favorite specializing in affordable but sophisticated egg sandwiches. Alvin also hosts the popular The Burger Show on First We Feast's YouTube channel, with many episodes exceeding 1 million views and guests such as Seth Rogen and Padma Lakshmi. Alvin's story of success, however, is an unlikely one. He emerged from his youth spent as part of an immigrant family in East LA feeling like he wasn't Filipino enough to be Filipino and not American enough to be an American, thus amboy, the term for a Filipino raised in America. He had to first overcome cultural traditions and family expectations to find his own path to success, and this unique cookbook tells that story through his recipes.
